Bio

BIO

Prof. Miranda specializes in structural engineering with emphasis on performance-based earthquake engineering. Using measurements made on the ground and on instrumented structures he studies how structures respond to earthquakes and conducts research to assess the impacts of earthquakes on structures and on society in general. He then uses this knowledge to develop ways to design and build structures that will have an improved performance. Also interested in developing computer tools for automating analysis, design and construction.

ACADEMIC APPOINTMENTS

- Professor, Civil and Environmental Engineering

ADMINISTRATIVE APPOINTMENTS

- Professor, Dept. of Civil and Environmental Engineering, Stanford University, (2016- present)
- Associate Professor, Dept. of Civil and Environmental Engineering, Stanford University, (2006-2016)
- Assistant Professor, Dept. Of Civil and Environmental Engineering, Stanford University, (1999-2006)

HONORS AND AWARDS

- President's Award, Los Angeles Tall Buildings Structural Design Council (2018)
- Top 25 Newsmakers, Engineering News Record (2015)
- Moisseiff Award, American Society of Civil Engineers (2006)
- Outstanding Journal Paper, Los Angeles Tall Buildings Structural Design Council (2006)
- Best conference paper, First Conf. on Future of Archt., Engnrg. & Construction Industry, Building Futures Council (2005)
- Special Citation, Major of Mexico City for technical contributions to the improvement of the Mexico City building code (2003)
- Terman Fellow, School of Engineering, Stanford University (2003)
- Special Citation, Governor of California, George Deukmijian for research conducted after the Loma Prieta earthquake (1990)

PROFESSIONAL EDUCATION

- PhD, University of California at Berkeley , Structural Engineering (1991)

- MSc, University of California at Berkeley , Structural Engineering (1988)
- Civil Engineer, National Autonomous University of Mexico (UNAM) , Civil Engineering (1986)
