Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

As a professor in the Medical Center Line, my primary investigative interest has been in clinical neuroradiology. This encompasses spinal cord and spine disease, degenerative and demyelinating diseases of the central nervous system, strokes and infarction, and chronic epilepsy syndromes. Facial and head and neck vascular malformations and hemangiomas have been a focus of interest for many years, with collaborative projects involving dermatology and functional restoration services.

Clinical projects utilizing magnetic resonance imaging, computed tomography, cerebral angiography and other neuroradiologic techniques are ongoing in collaboration with the vascular surgery department.

CLINICAL TRIALS

- Cervical Nodal Mets in Squamous Cell Carcinoma of H&N - MRI, FDG-PET, & Histopathologic Correlation, Not Recruiting
