#### CURRENT RESEARCH AND SCHOLARLY INTERESTS

I have been involved in the care and in studies of the Natural History and complications of Cardiac Transplantation since 1980.

In 1976, following a year spent in the observation and care of children undergoing surgery for repair of congenital heart disease, I pursued a special interest in this area and participated in the care of adults with these lesions with our Pediatric Cardiologists and surgeons. I have maintained and extended my involvement with time and look forward to a growing proportion of these patients in my practice at Stanford.
