Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

For the past 15 years I have been developing a research program for eating disorders in children and adolescents. I am an established scientist with over 200 publications including original peer reviewed articles, professional articles, book chapters, and books in the field. I have completed several NIH funded treatment studies and am currently involved as PI or Co-PI on three additional awards all focused on treatment interventions for eating disorders. Despite the relative frequency of anorexia nervosa (prevalence estimated at 0.48-0.7% among adolescents) and bulimia nervosa (estimated prevalence 3% in adolescents), little systematic research has been conducted in effective treatments for these disorders. My work is beginning to remedy this through the development of systematic studies of these disorders, particularly for youth.

CLINICAL TRIALS

- Confirming the Effectiveness of Online Guided Self-Help Family-Based Treatment for Adolescent Anorexia Nervosa, Recruiting
- Confirming the Efficacy/Mechanism of Family Therapy for Children With Low Weight ARFID, Recruiting

- Implementing FBT for Adolescent AN for Providers in Private Practice, Recruiting
- Adaptive Family Treatment for Adolescent Anorexia Nervosa, Not Recruiting
- Comparison of Two Types of Family Therapy in the Treatment of Adolescent Anorexia Nervosa, Not Recruiting
- Effectiveness of Cognitive Remediation Therapy in Improving Treatment Retention in People With Anorexia Nervosa, Not Recruiting
- Effectiveness of Family-Based Versus Individual Psychotherapy in Treating Adolescents With Anorexia Nervosa, Not Recruiting
- Feasibility of Combining Family and Cognitive Therapy to Prevent Chronic Anorexia, Not Recruiting
