

Stanford

Alistair Philip

Professor of Pediatrics at the El Camino Hospital, Emeritus

Bio

ACADEMIC APPOINTMENTS

- Emeritus Faculty - University Medical Line, Pediatrics

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

Neonatal infection: Primarily the evaluation of diagnostic tests and how they may be incorporated into decisions concerning duration of antibiotic therapy. Also interested in the epidemiology and management of sepsis and meningitis.

Intraventricular hemorrhage: Involved in a multicenter randomized controlled trial of prophylactic indomethacin administration. Also involved with studies relating to the etiology of this disorder in newborn infants.
