Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

Dr. Koopman's current research includes the following:

1) A collaboration with experts in Lyme disease and biostatistics to examine diverse manifestations of Lyme disease and their relationships to demographic and medical characteristics and diagnostic tests.

2) In collaboration with the Sierra Streams Institute in Nevada City, we are pilot-testing the feasibility, acceptability and satisfaction associated with an intervention using at-home group video conferencing designed to improve quality of life among women in rural communities who have been diagnosed with breast cancer.

3) Developing an on-line survey on Lyme disease, erythema migrans ("bull's-eye" rash), medication use, and symptom severity.

4) Collaborating (as Co-Investigator) with Dr. Oxana Palesh (PI) and colleagues on research to evaluate a brief behavioral intervention for insomnia during chemotherapy.

CLINICAL TRIALS

- Brief Behavioral Intervention for Insomnia During Chemotherapy, Recruiting
- Efficacy of Group Intervention to Reduce Stress Symptoms, Recruiting
- Alternative Support for Rural and Isolated Women in an HMO, Not Recruiting
- Expanding Rural Access: Distance Delivery of Support, Not Recruiting
- Expanding Rural Access: Distance Delivery of Support Groups (Main Study), Not Recruiting
- Phase I: At-Home Support for Rural Women Using Group Video Calling, Not Recruiting
- Sleep, Circadian Hormonal Dysregulation, and Breast Cancer Survival, Not Recruiting

Teaching

GRADUATE AND FELLOWSHIP PROGRAM AFFILIATIONS

- Psychiatry and Behavioral Science (Fellowship Program)
