## Daniel V. Madison

Professor of Molecular and Cellular Physiology

Molecular & Cellular Physiology

NIH Biosketch available Online

Curriculum Vitae available Online

### Bio

---

#### BIO

Dr. Madison holds a Bachelor of Science from the University of California at Irvine (UCI), and a Ph.D. in Neurosciences from the University of California at San Francisco (UCSF). He completed postdoctoral fellowships at UCSF with Dr. Roger Nicoll, M.D. and at Yale University School of Medicine with Dr. Richard W. Tsien, DPhil. He joined the faculty of Stanford University School of Medicine in 1989.

#### ACADEMIC APPOINTMENTS

- Professor, Molecular & Cellular Physiology
- Member, Bio-X
- Member, Wu Tsai Neurosciences Institute

#### ADMINISTRATIVE APPOINTMENTS

- Associate Chair, Department of Molecular & Cellular Physiology, (2016-3017)
- Chair, Admissions Committee, Dept. Molecular and Cellular Physiology, (2005-2020)
- Senator at large, Medical School Faculty Senate, (2004-2009)
- Director of Graduate Studies, Dept. Molecular and Cellular Physiology, (2003-2020)
- Committee on Graduate Admissions & Program (CGAP), School of Medicine, (2000-2020)
- Director of Admissions, Neurosciences Graduate Program, (1997-2003)
- Executive Committee, Neurosciences Graduate Program, (1995-2003)
- MSTP Admissions Committee, MSTP, (1995-1999)
- Committee of Five, School of Medicine, (1994-1995)
- Director of Graduate Studies, Dept. Molecular and Cellular Physiology, (1990-1997)
- Graduate Admission Committee, Dept. Molecular and Cellular Physiology, (1990-1997)
- Departmental Senator, Medical School Faculty Senate, (1990-1995)

#### HONORS AND AWARDS

- Lucille P. Markey Scholar, Lucile P. Markey Charitable Trust (.)
- Young Investigator Award, Society for Neuroscience (.)

#### PROFESSIONAL EDUCATION

- Ph.D., Univ.of Calif. San Francisco , Neurosciences (1984)

- B.S., University of California, Irvine , Biological Sciences (1979)

## COMMUNITY AND INTERNATIONAL WORK

- MBL Neurobiology Course, Woods Hole, MA

## Research & Scholarship

---

### CURRENT RESEARCH AND SCHOLARLY INTERESTS

Our laboratory is interested in the basic function, plasticity and modulation of Central Nervous System synapses, including studies of the detailed structure and protein content of synapses in different plastic states. We also have a strong interest in the pathophysiology in Alzheimer's disease as related to the functions of endocannabinoids and of the plasticity and myelination of parvalbumin-containing cortical interneurons. We use primarily electrophysiological techniques along with high-resolution imaging array tomographic imaging to dissect the function of synapses undergoing changes due either to external stimuli, disease states or internal modulation, with an eye to understanding how those changes may affect behavior and memory. Recently, we have also added the approach of single-cell RNA-seq from neurons that we have recorded from.

Recent projects in the laboratory include a study of the development and function of myelination in parvalbumin+ interneurons and the nature of their synaptic connection to individual target neurons. We have also studied the role of the amyloid peptide A-beta in modulating synaptic inhibition through an action on the endogenous cannabinoid system of the hippocampus; the role of the Fragile X mental retardation protein in the formation of neural circuits, an array tomographic study on the influence of synaptic plasticity on the number of synapses made in neural microcircuits, and on the localization of AMPA receptor subunits in different states of plasticity.

Studies in the lab are carried out using a full range of electrophysiological techniques including extracellular field potential recording, intracellular recording, whole cell and single channel recording in hippocampal slices and cultured neurons. In addition we utilize high resolution imaging of synaptically connected pairs of neurons using array tomography techniques. We are just beginning to study the gene expression properties of the same individual neurons we record from and develop array tomographic reconstructions from.

## Teaching

### COURSES

#### 2023-24

- MCP Journal Club and Professional Development Series: MCP 208 (Win, Spr)
- Neuro-Cellular Core: NEPR 201 (Win)

#### 2022-23

- MCP Journal Club and Professional Development Series: MCP 208 (Win, Spr)
- Neuro-Cellular Core: NEPR 201 (Win)

#### 2021-22

- MCP Journal Club and Professional Development Series: MCP 208 (Win, Spr)
- Neuro-Cellular Core: NEPR 201 (Win)

#### 2020-21

- MCP Journal Club and Professional Development Series: MCP 208 (Aut, Win, Spr)

- Neuro-Cellular Core: NEPR 201 (Win)
- Neuroscience Journal Club and Professional Development Series: NEPR 280 (Win, Spr)

## STANFORD ADVISEES

### Doctoral Dissertation Reader (AC)

Raymond McKoy, Theo Ruffins

## GRADUATE AND FELLOWSHIP PROGRAM AFFILIATIONS

- Molecular and Cellular Physiology (Phd Program)
- Neurosciences (Phd Program)

## Publications
