Barbara Sommer

Associate Professor of Psychiatry and Behavioral Sciences at the Stanford University Medical Center, Emerita

CLINICAL OFFICE (PRIMARY)

- **Psychiatry**

401 Quarry Rd Ste 2337

MC 5723

Stanford, CA 94305

Tel (650) 498-9111 **Fax** (650) 724-9900

Bio

BIO

Dr. Barbara Sommer specializes in geriatric psychiatry, treating older patients suffering from depression, anxiety, psychosis, and cognitive disorders, often in the context of concomitant medical illnesses. She has practiced in both inpatient and outpatient settings for over thirty years and she has a special interest in the unique primary and side effects of psychiatric medications in older patients also being treated for non-psychiatric disorders. She also is a member of the electroconvulsive therapy (ECT) service.

CLINICAL FOCUS

- Geriatric Psychiatry
- Psychiatry

ACADEMIC APPOINTMENTS

- Professor Emeritus-Hourly, Psychiatry and Behavioral Sciences

ADMINISTRATIVE APPOINTMENTS

- Member, Stanford Hospital Care Review Committee, (1997-2006)
- Member, Stanford Hospital Well Being of Physicians Committee, (2001- present)

BOARDS, ADVISORY COMMITTEES, PROFESSIONAL ORGANIZATIONS

- Member, Stanford Medical Staff Well-Being of Physicians and Physicians- in -Training Committee (2001 - present)

PROFESSIONAL EDUCATION

- Board Certification: Geriatric Psychiatry, American Board of Psychiatry and Neurology (2002)
- Medical Education: New York Medical College Registrar (1979) NY
- Board Certification: Psychiatry, American Board of Psychiatry and Neurology (1985)
- Fellowship: Massachusetts General Hospital and McLean Hospital - OCD Department (1985) MA

- Residency: Tufts-New England Medical Center (1984) MA
- Internship: Baystate Medical Center (1980) MA
- MD, New York Medical College , Medicine (1979)

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

My academic interest is in intellectual function and its adaptability over the course of a person's lifetime despite the stressors placed upon it.

My papers have focused on the evaluation of ways in which co-morbid factors such as folic acid deficiency or its administration, or anticholinergic drugs prior to ECT affect cognitive function. Anticholinergic medications deplete brain stores of the acetylcholine, known to be a key neurotransmitter in language acquisition and memory storage and retrieval. These drugs not only worsen symptoms of Alzheimer's disease, but are known to cause delirium when given in high doses. I have been interested in the long-term effects of these drugs and whether cognitive impairment is prolonged.

Teaching

GRADUATE AND FELLOWSHIP PROGRAM AFFILIATIONS
