W. Stewart Agras

Professor of Psychiatry and Behavioral Sciences, Emeritus

Bio

BIO

Stewart Agras obtained his M.D. from University College, London, England in 1955 and completed his residency and Fellowship in Psychiatry at McGill University in 1961. Since 1973 he has been a member of the faculty of the Department of Psychiatry at Stanford University School of Medicine. For much of his career his research interests have been in the investigation of behavior change in areas such as treatment compliance, essential hypertension and other cardiovascular risk factors, and anxiety disorders. In 1974 he began one of the first programs in Behavioral Medicine in the United States, a program that continues today at Stanford University. For the last 20-years the majority of his work has been in the area of eating disorders, with studies ranging from epidemiology, basic psychological mechanisms, and treatment.

Dr Agras has been Editor of the Journal of Applied Behavior Analysis and the Annals of Behavioral Medicine, and has served on a large number of Editorial Boards, in addition he has been President of the Association for the Advancement of Behavior Therapy (AABT) and was the first President of the Society for Behavioral Medicine. He has also spent two years at the Center for Advanced Study of the Behavioral Sciences and in addition was co-Director of one of the summer programs for promising young faculty at the Center.

He is presently Professor (Emeritus) of Psychiatry in the Department of Psychiatry and Behavioral Sciences at Stanford University School of Medicine, and is continuing his research program in eating disorders.

ACADEMIC APPOINTMENTS

- Emeritus Faculty, Acad Council, Psychiatry and Behavioral Sciences
- Faculty Affiliate, Institute for Human-Centered Artificial Intelligence (HAI)

BOARDS, ADVISORY COMMITTEES, PROFESSIONAL ORGANIZATIONS

- Associate Editor, Journal of Applied Behavior Analysis (1971 - 1974)
- Editor, Journal of Applied Behavior Analysis (1974 - 1977)
- Editor, Annals of Behavioral Medicine (1987 - 1990)
- Editorial Board, Appetite (1995 - present)
- Editorial Board, International Journal of Eating Disorders (1990 - present)
- President, Society for Behavioral Medicine (1978 - 1979)
- President, Association for the Advancement of Behavior Therapy (1985 - 1986)
- Chair, NIMH Psychopathology and Clinical Biology Research Review Committee (1989 - 1991)
- Chair, NIH Health Behavior and Prevention Research Review Committee (1995 - 2000)
- Fellow, Center for Advanced Study in the Behavioral Sciences (1976 - 1977)
- Co-Director Summer Institute, Center for Advanced Study in the Behavioral Sciences (1988 - 1988)

- Fellow, Center for Advanced Study in the Behavioral Sciences (1990 - 1991)

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

The principal theme of my research is the understanding of human feeding and its disorders, namely: obesity, anorexia nervosa, bulimia nervosa, binge eating disorder and selective eating (picky eating) across the age span. Current and past research projects range from basic studies through single site and multicenter clinical trials.

In a large-scale international multisite controlled clinical trial funded by the NIH two types of family therapy for anorexia nervosa are being compared. In addition to being a study site, our laboratory is the data and coordinating center for this study. Several large data sets from previous multisite studies allow for analyses both within and across studies involving large sample sizes. Hence, many secondary questions regarding the eating disorders can be addressed.

A second study is examining two methods of teaching community therapists the skills needed to use interpersonal psychotherapy for eating disorders and depression. This is a cluster randomized study in which college campuses across the US are randomly allocated to one of the teaching methods.

A further study is examining basic questions concerning the prevention of overweight in early childhood in preparation for a large-scale early prevention study. Other studies include the epidemiology and course of picky eating and in collaboration with Dr Jim Lock examining the treatment of bulimia nervosa in adolescents and the effects of using cognitive remediation therapy in adult anorexics.

CLINICAL TRIALS

- Comparison of Two Types of Family Therapy in the Treatment of Adolescent Anorexia Nervosa, Not Recruiting
- Effectiveness of Binge Eating Disorder Treatments, Not Recruiting
- Effectiveness of Stepped Care Versus Best Available Care for Bulimia Nervosa, Not Recruiting
- Optimizing Fidelity to Family-Based Treatment for Adolescent Anorexia Nervosa, Not Recruiting
- Prevention of Childhood Obesity, Not Recruiting

PROJECTS

- Implementation of evidence-based treatment for on-campus eating disorders - Stanford University
