#### BIO

Environmental enteric dysfunction (EED) affects 50-90% of children in low-income countries and is likely an important factor in child stunting as it impedes efficient nutrient uptake in the small intestine. EED is suspected to be the result of persistent exposure to enteric pathogens, although it has not been correlated with any specific pathogen. My research explores the interplay of gut microbiota, including enteric pathogens, and the host immune system with a focus on understanding EED so we can rationally design treatments and preventive measures.

#### HONORS AND AWARDS

- Stanford Interdisciplinary Graduate Fellowship, Stanford University (2015-2018)
- Graduate Research Fellowship, National Science Foundation (2011-2015)

#### BOARDS, ADVISORY COMMITTEES, PROFESSIONAL ORGANIZATIONS

- Member, Stanford Military-Affiliated Advisory Committee (2019 - present)
- Member, American Society of Tropical Medicine and Hygiene (2014 - present)
- Member, American Society for Microbiology (2009 - present)

#### PROFESSIONAL EDUCATION

- PhD, Stanford University (2019)
- MS, Penn State University (2011)
- BS, United States Military Academy at West Point (2001)

#### STANFORD ADVISORS

- David Relman, Postdoctoral Research Mentor

#### LINKS

- Relman Lab: <http://med.stanford.edu/relmanlab.html>
- Luby Lab: <https://lubylab.sites.stanford.edu/>

### Research & Scholarship

---

#### LAB AFFILIATIONS

- David Relman (10/21/2019)
- Stephen Luby (11/9/2013)
- Alfred Spormann (11/8/2013 - - 8/31/2019)
