Bio

BIO

My research interests focus on the long term effects of chronic lung disease on respiratory structure and resultant lung function. Lab research involves measuring structural function with serial CT imaging at similar lung volumes and expiratory CT scans to optimize evaluation of regional small airway disease. The advantage of understanding the molecular and physiologic events of lung disease provides the opportunity for preemptive medical intervention before symptoms appear.

ACADEMIC APPOINTMENTS

- Emeritus Faculty - University Medical Line, Pediatrics - Pulmonary Medicine
- Member, Maternal & Child Health Research Institute (MCHRI)

ADMINISTRATIVE APPOINTMENTS

- Packard Children's Hospital Resident Education Committee, LPCH, (2001-2002)
- Medical Specialties Peer Review Committee, LPCH, (2005-2007)

HONORS AND AWARDS

- Honorary Invited Speaker Annual Scientific Meeting, Sydney, Australia, Auckland, New Zealand,, The Thoracic Society of Australia & New Zealand and ANZSRS (March 2007)
- Honorary Invited Participant, Leuven, Belgium, European Respiratory Society (February 2007)
- Provider of the Year, Cystic Fibrosis Foundation, Northern California Chapter (October 2006)

PATENTS

- Michael D. Black, Purna Prasad, Terry E. Robinson. "United States Patent 6,869,397 Non-tethered macro to micro endoscope", The Board of Trustees of the Leland Stanford Junior University, Mar 22, 2005
- Terry Robinson, Wallace White, Nicholas Kalayjian. "United States Patent 6,631,716 Dynamic Respiratory Control", The Board of Trustees of the Leland Stanford Junior University, Oct 14, 2003

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

My research interests focus on detection of early and progressive Cystic fibrosis (CF) structural lung disease by utilizing chest CT imaging and CT post-processing methodology. Current research efforts involve utilization of low dose infant & children CT imaging protocols and quantitative airway and air trapping algorithms to evaluate early and progressive CF disease. Additional areas of research in our laboratory include defining more direct pulmonary outcome measures to evaluate treatment effects in chronic diseases such as cystic fibrosis and pulmonary alveolar proteinosis.

CLINICAL TRIALS

- Infant Study of Inhaled Saline in Cystic Fibrosis, Recruiting
- Rare Genetic Disorders of the Breathing Airways, Recruiting
- Controlled Ventilation CT in CF Infants, Not Recruiting
- Outcome Measures in Infant/Early Childhood Lung Disease w/ Chest CT Scanning & Lung Function Testing, Not Recruiting
- Safety and Efficacy of LDV/SOF Fixed-Dose Combination (FDC) ± Ribavirin in HCV Genotype 1 Subjects, Not Recruiting
- The EPIC Observational Study, Not Recruiting

Teaching

GRADUATE AND FELLOWSHIP PROGRAM AFFILIATIONS

- Pediatric Pulmonology (Fellowship Program)
- Pediatric Radiology (Fellowship Program)
