Bio

ACADEMIC APPOINTMENTS

- Emeritus Faculty, Acad Council, Medicine
- Member, Cardiovascular Institute

ADMINISTRATIVE APPOINTMENTS

- Co-Founder and Director Emeritus, Stanford Center for Biomedical Ethics, (1989- present)
- Chief, Pulmonary and Critical Care Medicine, Stanford Department of Medicine, (1991-2004)
- Director and Founder, Stanford University-Asia Medical Fund, Stanford University fellowships from Pacific Rim, (1982- present)
- Board Member, NewLink Genetics, NewLink Genetics, Inc., (2000- present)
- Advisor, Broncus Technologies, Inc., (1996- present)
- Consultant, Nektar, Inc., (1999- present)
- Co-Founder, Hutchison Program in Translational Medicine at Stanford University(\$5,000,000), (1998-2003)
- Co-Founder and Co-Director, Stanford Program in Genomics, Ethics and Society, (1995- present)
- Course Founder and Director - Intensive Life Support Systems: Present Practice and Moral Issues, Stanford University Undergraduate Curriculum, (1984-1988)
- Course Founder and Director - Ethical Values in Health Care: Lessons from the Nazi Period, Stanford University Undergraduate Curriculum, (1994-1996)

HONORS AND AWARDS

- Henry J. Kaiser Foundation Award for Excellence in Clinical Teaching, Stanford University Medical School (1980)
- Arthur L. Bloomfield Award for Excellence in the Teaching of Clinical Medicine, Stanford University Medical School (1981)
- Henry J. Kaiser Foundation Award for Excellence in Clinical Teaching, Stanford University Medical School (1984)
- Henry J. Kaiser Award for Excellence in Clinical Teaching, Stanford University Medical School (1988)
- Henry J. Kaiser Foundation Award for Excellence in Preclinical Teaching, Stanford University Medical School (1997)

PROFESSIONAL EDUCATION

- Fellow, Stanford Medical School , Pulmonary and Critical Care (1978)
- Resident, Peter Bent Brigham Hospital , Internal Medicine (1975)
- MD, Stanford School of Medicine , Medicine (1973)
- AB, Stanford University , Biological Sciences (1968)

COMMUNITY AND INTERNATIONAL WORK

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

Acute lung tissue injury is often mediated by neutrophils. Our laboratory studied the basic biology of neutrophils and mechanisms of neutrophil-mediated pulmonary injury. Investigative approaches included the molecular biology of neutrophil activation, neutrophil ion channel regulation, mechanisms of signal transduction with an emphasis on protein phosphorylation, control of neutrophil activation and the use of animal models to investigate the use of agents and intermediaries which might attenuate neutrophil-mediated acute lung injury. Besides these areas of basic investigation, clinical studies in biomedical ethics were also pursued. For example: End-of-life decision making, differences in informed consent and decision making between patients and physicians in Japan and America, the efficacy of ethics committees in the United States, the new role of biomedical ethics in managed care; social, ethical and legal issues in genomics and genetic testing, and neuroethics.
