Bio

BIO

Stanford researchers are creating a micro-device that physicians could guide through the body to help diagnose and treat clogged arteries and other diseases. Tethered to the outside world by a thin wire, a tiny machine creeps through blood vessels, searching out deadly plaques and obliterating them with a zap of a laser. While a laser will come later, for now David Liang, MD, PhD, is focusing on a tiny eye that could give physicians an unprecedented view into blood vessels.

CLINICAL FOCUS

- Marfan Syndrome and Aortic Disorders
- Cardiac Imaging
- Echocardiography
- Cardiovascular Disease

ACADEMIC APPOINTMENTS

- Professor - Med Center Line, Medicine - Cardiovascular Medicine
- Professor - Med Center Line (By courtesy), Electrical Engineering
- Member, Cardiovascular Institute

PROFESSIONAL EDUCATION

- Fellowship: Stanford University Cardiovascular Medicine Fellowship (1995) CA
- Residency: Stanford University Internal Medicine Residency (1992) CA
- Internship: Stanford University Internal Medicine Residency (1990) CA
- Medical Education: Stanford University School of Medicine Registrar (1989) CA
- Board Certification: Cardiovascular Disease, American Board of Internal Medicine (1995)
- BSEE, MIT, Electrical Engineering (1981)
- Ph.D., Stanford University, Electrical Engineering (1989)

- M.D., Stanford University , Medicine (1989)
