

Kevin Boyce

Professor of Geological Sciences

 Curriculum Vitae available Online

Bio

ACADEMIC APPOINTMENTS

- Professor, Geological Sciences
- Member, Bio-X

ADMINISTRATIVE APPOINTMENTS

- Chair, Department of Geological Sciences, Stanford University, (2020- present)
- Professor (by courtesy), Biological Sciences, Stanford University, (2019- present)
- Professor, Geological Sciences, Stanford University, (2018- present)
- Associate professor, Stanford University, (2013-2018)
- Associate professor, University of Chicago, (2010-2013)
- Assistant professor, University of Chicago, (2003-2010)
- National Research Council associate, NASA Astrobiology Institute, (2001-2003)

HONORS AND AWARDS

- Klepser Distinguished Lectureship, University of Tennessee (2015)
- Fellow, MacArthur Foundation (2013-2018)
- W. S. Cooper Award, Ecological Society of America (2012)
- Fellow, Paleontological Society (2011-)
- Charles Schuchert Award, Paleontological Society (2011)
- Postdoctoral fellowship (declined), CIW Geophysical Laboratory (2001)
- Predoctoral fellowship, NSF (1996-1999)

BOARDS, ADVISORY COMMITTEES, PROFESSIONAL ORGANIZATIONS

- Editor, Paleobiology (2018 - present)
- Member, Fellows Committee, Paleontological Society (2017 - 2019)
- Member, Cooper Award committee, Ecological Society of America (2014 - 2016)
- Extended adviser, Deep Time exhibit, Smithsonian NMNH (2014 - 2015)
- Member, Strimple Award committee, Paleontological Society (2012 - 2015)
- Associate editor, Paleobiology (2011 - 2018)
- Chair, Paleobotanical Section, Botanical Society of America (2006 - 2007)

- Research associate, Geology, Field Museum of Natural History (2004 - 2014)
- Member, Moseley Award committee, Botanical Society of America (2004 - 2006)
- Member, Cookson Award committee, Botanical Society of America (2003 - 2003)
- Predoctoral fellow, Geophysical Laboratory, Carnegie Institution of Washington (1999 - 2001)

PROFESSIONAL EDUCATION

- Ph.D., Harvard University , Organismic & Evolutionary Biology (2001)
- B.S., California Institute of Technology , Literature (1995)
- B.S., California Institute of Technology , Biology (1995)

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

I focus on the initial evolution of complex multicellular life on land in the Paleozoic (542 to 250 million years ago) through the establishment of more modern ecosystems over the Mesozoic (250 to 65 million years ago). I am interested in fossils as the remnants of functioning biological organisms that can inform on the evolution of their physiology, development, and biochemistry. Those organisms preserved in the fossil record were also components of larger ecological and environmental systems and I am particularly interested in how the evolution of physiology and structure would have influenced those larger systems including carbon and other nutrient cycles as well as climate. In practice, my work involves both living and fossil organisms and a wide variety of collaborative approaches: developmental and physiological investigation, modeling of climate and the geological carbon cycle, comparative study of morphological diversity through time, and cell and tissue-specific analysis of fossil elemental, isotopic, and organic chemistry.

My science has been rooted in the plant fossil record and the particular advantages that the anatomical preservation of plant fossils provides for studying physiological and developmental evolution. Over the last decade, my work and that of my students has increasingly come to encompass the complete terrestrial biota including animals, fungi, and microbial communities. My students can expect to develop their own projects and be as much collaborator as apprentice. Applicants are welcome from both geological or biological backgrounds and with interest or expertise in any component of the terrestrial system.

Teaching

COURSES

2021-22

- New Worlds and Old: The biogeography of the Age of Discovery as the foundation for later insights in: OSPMADR 93 (Win)
- Soil Biology: GEOLSCI 206 (Aut)

2020-21

- Evolution of Terrestrial Ecosystems: BIO 148, BIO 228, EARTHYSYS 128, GEOLSCI 128, GEOLSCI 228 (Spr)
- Fundamentals of Geobiology: EARTHYSYS 205A, ESS 205, GEOLSCI 205 (Aut)

2019-20

- Evolution of the Holometabolous Insects: GEOLSCI 206A (Win)
- Topics in Organismal Paleobiology: GEOLSCI 206 (Aut)

2018-19

- Evolution of Terrestrial Ecosystems: EARTHYSYS 128, GEOLSCI 128, GEOLSCI 228 (Win)
- Topics in Organismal Paleobiology: GEOLSCI 206 (Aut)

STANFORD ADVISEES

Doctoral Dissertation Reader (AC)

Tyler Kukla, Richard Stockey

Doctoral Dissertation Advisor (AC)

Andres Baresch, Michael D'Antonio, Sandra Schachat

Doctoral (Program)

Seamus Callaghan, Michael D'Antonio

Publications

PUBLICATIONS

- **A new anachoropterid fern from the Asselian (Cisuralian) Wuda Tuff Flora** *REVIEW OF PALAEOBOTANY AND PALYNOLOGY*
