

Stanford

Derek Fong

Sr Research Engineer
Civil and Environmental Engineering

Bio

BIO

Derek Fong's research in environmental and geophysical fluid dynamics focuses on understanding the fundamental transport and mixing processes in the rivers, estuaries and the coastal ocean. He employs different methods for studying such fluid processes including laboratory experiments, field experiments, and numerical modeling. His research projects include studying lateral dispersion, in stratified coastal flows, the fate and transport of freshwater in river plumes, advanced hydrodynamic measurement techniques, coherent structures in nearshore flows, bio-physical interactions in stratified lakes, fate of contaminated sediments, and secondary circulation and mixing in curved channels.

Derek teaches a variety of classes at both the undergraduate and graduate level. Some of the classes he has offered include Mechanics of Fluids; Rivers, Streams and Canals; Transport and Mixing in Surface Waters; Introduction to Physical Oceanography; Mechanics of Stratified Fluids; Dynamics of Lakes and Reservoirs; Science and Engineering Problem Solving using Matlab; the Future and Science of Water; Hydrodynamics and Geophysical Fluid Dynamics.

Prior to coming to Stanford, Derek spent five years at the Massachusetts Institute of Technology and Woods Hole Oceanographic Institution studying the dynamics of freshwater plumes for his doctoral thesis. He has also served as a senior lecturer at the University of Washington, Friday Harbor Laboratories in Friday Harbor, Washington.

ACADEMIC APPOINTMENTS

- Sr Research Engineer, Civil and Environmental Engineering

HONORS AND AWARDS

- SSP Teaching Award, Singapore-Stanford Partnership (2007)
- Pritchard Award, Coastal Estuarine Research Federation (2012)

PROFESSIONAL EDUCATION

- B.S., Stanford University , Civil Engineering, with distinction (1991)
- M.S., Stanford University , Water Resources Engineering (1992)
- Ph D., MIT/WHOI Joint Program , Physical Oceanography (1998)

Teaching

COURSES

2023-24

- Big Earth Hackathon Wildland Fire Challenge: CEE 165H, CEE 265H (Spr)
- Engineering Economics and Sustainability: CEE 146S, ENGR 60 (Sum)
- Environmental Governance and Climate Resilience: CEE 265F, SUSTAIN 248 (Win)
- Integrated Civil Engineering Design Project: CEE 183 (Spr)
- Introduction to Mechanics of Fluids: CEE 101E (Sum)
- Introduction to Physical Oceanography: CEE 162D, CEE 262D, EARTHSYS 164, ESS 148 (Aut)

2022-23

- Big Earth Hackathon Wildland Fire Challenge: CEE 165H, CEE 265H (Spr)
- Engineering Economics and Sustainability: CEE 146S, ENGR 60 (Sum)
- Integrated Civil Engineering Design Project: CEE 183 (Spr)
- Introduction to Mechanics of Fluids: CEE 101E (Sum)
- Introduction to Physical Oceanography: CEE 162D, CEE 262D, EARTHSYS 164, ESS 148 (Win)
- Rivers, Streams, and Canals: CEE 162E, CEE 262E (Spr)

2021-22

- Big Earth Hackathon Wildland Fire Challenge: CEE 165H, CEE 265H, EARTH 165H, EARTH 265H (Spr)
- Computations in Civil and Environmental Engineering: CEE 101D, CEE 201D (Aut)
- Engineering Economics and Sustainability: CEE 146S, ENGR 60 (Sum)
- Integrated Civil Engineering Design Project: CEE 183 (Spr)
- Introduction to Mechanics of Fluids: CEE 101E (Sum)
- Introduction to Physical Oceanography: CEE 162D, CEE 262D, EARTHSYS 164, ESS 148 (Win)
- Rivers, Streams, and Canals: CEE 162E, CEE 262E (Spr)

2020-21

- Introduction to Physical Oceanography: CEE 162D, CEE 262D, EARTHSYS 164, ESS 148 (Win)
- Rivers, Streams, and Canals: CEE 162E, CEE 262E (Spr)
