Robert M Gray

Alcatel-Lucent Professor in Communications and Networking, Emeritus

Electrical Engineering

Bio

BIO

Robert M. Gray is the Alcatel-Lucent Technologies Professor of Communications and Networking in the School of Engineering, Emeritus, and Professor of Electrical Engineering, Emeritus, at Stanford University. He is a Fellow of the IEEE and the Institute for Mathematical Statistics and he was a 1981--82 Fellow of the John Simon Guggenheim Foundation. His professional awards include an Education Award, Meritorious Service Award, Technical Achievement Award, and Society award from the IEEE Signal Processing Society, a Golden Jubilee Award for Technological Innovation and the Claude E. Shannon Award from the IEEE Information Theory Society, and the Jack S. Kilby Signal Processing Medal and Centennial and Third Millennium Medals from the IEEE. He received a Presidential Award for Excellence in Science, Mathematics and Engineering Mentoring (PAESMEM). He is a member of the National Academy of Engineering. He retired from Stanford in April 2013 and is currently a Research Professor at Boston University.

ACADEMIC APPOINTMENTS

- Emeritus Faculty, Acad Council, Electrical Engineering

HONORS AND AWARDS

- 2020 Okawa Prize, The Okawa Foundation for Information and Telecommunications (2021)

- Aaron D. Wyner Distinguished Service Award, IEEE Information Theory Society (2020)

- Stanford University President's Award for Excellence through Diversity, Stanford University (2013)

- Education Award, IEEE Signal Processing Society (2009)

- Research Fellow, Michelle R. Clayman Institute for Gender Research, Stanford University (2008-2009)

- Claude E. Shannon Award, IEEE Information Theoryt Society (2008)

- Jack S. Kilby Signal Processing Medal, IEEE (2008)

- Member, National Academy of Engineering (2007)

- Distinguished Lecturer, IEEE Signal Processing Societyt (2006-2007)

- Meritorious Service Award, IEEE Signal Processing Society (2005)

- First Lucent Technologies Chair in Communications and Networking in the School of Engineering, Stanford University (2004)

- Distinguished Alumni in Academia Award, University of Southern California (2003)

- Presidential Award for Excellence in Science, Mathematics and Engineering Mentoring (PAESMEM), White House and NSF (2002)

- Third Millennium Medal, IEEE (2000)

- Golden Jubilee Award for Technological Innovation, IEEE Information Theory Society (1998)

- Vinton Hayes Distinguished Visiting Scholar, Harvard University (1995)

- Society Award, IEEE Signal Processing Society (1993)

- Fellow, Institute for Mathematical Statistics (IMS) (1992)

- Fellowship, NATO/Consiglio Nazionale delle Ricerche (1990)

- Fellowship, University of Napoli, NATO/Consiglio Nazionale delle Ricerche (1990)

- Centennial Medal, IEEE (1984)

- Senior Award, IEEE Signal Processing Society (1983)

- Fellowship, John Simon Guggenheim Foundation (1982)

- Fellowship, Japan Society for the Promotion of Science (1981)

- Fellow, IEEE (1980)

- Prize Paper Award, IEEE Information Theory Group (1976)

BOARDS, ADVISORY COMMITTEES, PROFESSIONAL ORGANIZATIONS

- Editor-in-Chief, Transactions on Information Theory, IEEE (1981 - 1983)

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

My current research falls in the intersection of Shannon information theory and signal processing. In particular, I am interested in the theory and design of block codes and sliding-block (or stationary or time-invariant) codes for data compression and their relation to each other. Block codes are far better understood and more widely used, but their lack of stationarity causes difficulties in theory and artifacts in practice. Very little is known about the design of good sliding-block codes, but the problem is known to be equivalent to the design of entropy-constrained simulators of complex random processes. I also do research in the history of information theory and signal processing, especially in the development of speech processing systems and real time signal processing.
