Scott Dixon

Associate Professor of Biology

Bio

BIO

As a graduate student and short-term postdoctoral fellow at the University of Toronto I studied genetic networks that regulate cell viability in the nematode worm *Caenorhabditis elegans* (*C. elegans*) and in the single-celled eukaryotes *S. cerevisiae* and *S. pombe*, respectively. As a postdoctoral fellow, I demonstrated that the small molecule erastin inhibits the membrane cystine/glutamate transporter system xc⁻, depletes the cell of glutathione and activates a novel iron-dependent, oxidative cell death pathway termed ferroptosis. Currently a major goal of my lab is to understand the interaction between intracellular metabolism and cell death. Our research program integrates techniques and model systems including small molecule and proteomic screening, biochemical analysis of protein function and model organism genetics.

ACADEMIC APPOINTMENTS

- Associate Professor, Biology
- Member, Bio-X
- Member, Stanford Cancer Institute
- Faculty Fellow, Stanford ChEM-H
- Member, Wu Tsai Neurosciences Institute

PROFESSIONAL EDUCATION

- B.Sc., Laurentian University , Behavioral Neuroscience (2000)
- Ph.D., University of Toronto , Molecular and Medical Genetics (2007)

LINKS

- My Lab Website: <http://www.dixonlaboratory.com/#dixonlab>

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

My lab is interested in the relationship between cell death and metabolism. Using techniques drawn from many disciplines my laboratory is investigating how perturbation of intracellular metabolic networks can result in novel forms of cell death, such as ferroptosis. We are interested in applying this knowledge to find new ways to treat diseases characterized by insufficient (e.g. cancer) or excessive (e.g. neurodegeneration) cell death.

Teaching

COURSES

2021-22

- Biochemistry & Molecular Biology: BIO 83 (Aut)
- Chemical Biology: BIO 173 (Spr)

2020-21

- Biochemistry & Molecular Biology: BIO 83 (Aut)
- Chemical Biology: BIO 173 (Spr)

2019-20

- Biochemistry & Molecular Biology: BIO 83 (Win)

2018-19

- Biochemistry & Molecular Biology: BIO 83 (Win)
- Frontiers in Biology: BIO 301 (Aut, Win, Spr)

STANFORD ADVISEES

wei wei

Doctoral Dissertation Reader (AC)

Tony Boutelle, Devin Bradburn, Ran Cheng, Anthony Cordova, Iris Mollhoff, Ju-Hyung Park, Lucy Xu

Postdoctoral Faculty Sponsor

Joan Ritho

Doctoral Dissertation Advisor (AC)

David Armenta, Martha Kahlson, Logan Leak, Magdalena Murray, Lauren Pope, Jason Rodencal

Undergraduate Major Advisor

Sophia Luo

Doctoral (Program)

David Armenta, Lauren Pope

GRADUATE AND FELLOWSHIP PROGRAM AFFILIATIONS

- Biology (School of Humanities and Sciences) (Phd Program)
- Cancer Biology (Phd Program)
