Bio

BIO

Connie Juel's research centers on literacy acquisition, especially as it is affected by school instruction. She is noted for both her longitudinal research on reading development, often following children across multiple school years, and her work on interventions to help struggling readers. She was awarded the National Reading Conference's Oscar Causey Award for outstanding contributions to reading research (2002) and was elected to the Reading Hall of Fame by the International Reading Association (2001).

- Child Development
- · Curriculum and Instruction
- · Literacy and Language
- Psychology
- · Teachers and Teaching

CURRENT RESEARCH AND SCHOLARLY INTERESTS

Poor Reading in Preterms: Neural Basis, Prediction, & Response to Intervention (with Heidi Feldman & Michal Ben Shachar). Five-year grant funded by NICHD, 2012-2017.

Effects of early elementary school instruction, and specific interventions, on literacy and language growth.

Longitudinal study of literacy development from preschool through first grade. Focus on classroom factors in 13 kindergarten and 13 first grade classrooms that affect growth across the years in children with different entering skill and language profiles.
