

## Dara Rouholiman

ML Research Engineer - Aim Lab, Anesthesia - Adult Pain (Designated)

### Bio

---

#### BIO

Dara is a machine learning research engineer at AIM lab with focus on clinical ML models' evaluation. He has 6+ years of experience developing ground breaking health sensors and models. Previously, he led the ML team at a hardware-health-tech startup backed by KV in Menlo Park and developed new methods and hardware that measures biomarkers' changes in blood. He also co-founded Teleshphora, an award winning startup that used geotemporal event modeling to mitigated opioid overdose outbreaks. Dara has a BS in physical chemistry with a minor in bioinformatics.
