

Stanford

John Fox

Adjunct Professor

Applied Physics

Curriculum Vitae available Online

Bio

BIO

Stanford University Research areas center on optimal control methods to improve energy efficiency and resource allocation in plug-in hybrid vehicles. Stanford graduate courses taught in laboratory techniques and electronic instrumentation. Undergraduate seminar "Energy Choices for the 21st Century".

Accelerator Physics Research areas center on RF systems and beam dynamics, instability control for particle accelerators, technology development for beam instrumentation. Group leader for LARP projects in LHC LLRF techniques and feedback control of electron-cloud instabilities in SPS and LHC. Extensive experience with beam feedback systems, digital signal processing techniques, accelerator dynamics and instrumentation for electron/positron and hadron synchrotrons and storage rings, LINAC systems.

Research and thesis supervision for Stanford Ph.D. and M.S. students in Applied Physics and Electrical Engineering. Two supervised students awarded American Physical Society Ph.D. Dissertation Prizes in Beam Physics (Shyam Prabhakar, Dmitry Teytelman). Ph.D. student Themis Mastorides awarded the 2010 Toohig Fellowship in Accelerator Physics at the LHC. Two supervised Ph.D. students now faculty at University of Singapore and California Polytechnic University.

I have advised 5 Ph.D. students through to completion of the Ph.D.. I have supervised 13 M.S. students in the areas of Applied Physics and Electrical Engineering

ACADEMIC APPOINTMENTS

- Adjunct Professor, Applied Physics

ADMINISTRATIVE APPOINTMENTS

- SuperKEKB Machine Advisory Committee, KEK Laboratory, Tsukuba, Japan, (2008- present)

HONORS AND AWARDS

- Dean's Award for Distinguished Teaching, Stanford Humanities and Sciences (2001)
- Fellow, Division of the Physics of Beams, American Physical Society (2008)
- Senior Member, IEEE (2018)

BOARDS, ADVISORY COMMITTEES, PROFESSIONAL ORGANIZATIONS

- Machine Advisory Committee, SuperKEKB KEK laboratory, Japan (2008 - present)

PROFESSIONAL EDUCATION

- Ph.D., Stanford University , Applied Physics, Ph.D. minor in Electrical Engineering (1986)
- A.B., Harvard University , Physics (1977)

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

Accelerator Physics Research areas center on RF systems and beam dynamics, instability control for particle accelerators, technology development for beam instrumentation. Group leader for

LARP projects in LHC LLRF techniques and feedback control of electron-cloud instabilities in SPS and LHC. Extensive experience with beam feedback systems, digital signal processing techniques, accelerator dynamics and instrumentation for electron/positron and hadron synchrotrons and storage rings, LINAC systems.

Stanford University Research areas center on optimal control methods to improve energy efficiency and resource allocation in plug-in hybrid vehicles. Stanford graduate courses taught in laboratory techniques and electronic instrumentation. Undergraduate course "Energy Choices for the 21st Century"

Research and thesis supervision for Stanford Ph.D. and M.S. students in Applied Physics and Electrical Engineering. Ph.D. student Themis Mastorides awarded the 2010 Toohig Fellowship in Accelerator Physics at the LHC. Two supervised Ph.D. students now faculty at University of Singapore and California Polytechnic University,

PROJECTS

- Optimal Control Methods for Fuel Efficiency and Battery Health & Longevity for PHEVs - Stanford University sponsored by the Ford-Stanford Alliance

Teaching

COURSES

2023-24

- Electronics and Introduction to Experimental Methods: PHYSICS 104 (Aut)
- Energy Options for the 21st Century: APPPHYS 79N (Aut)

- Laboratory Electronics: APPPHYS 207 (Win)

2022-23

- Electronics and Introduction to Experimental Methods: PHYSICS 104 (Aut)
- Energy Options for the 21st Century: APPPHYS 79N (Aut)
- Laboratory Electronics: APPPHYS 207 (Win)
- Laboratory Electronics: APPPHYS 208 (Spr)

2021-22

- Electronics and Introduction to Experimental Methods: PHYSICS 104 (Aut)
- Energy Options for the 21st Century: APPPHYS 79N (Aut)
- Laboratory Electronics: APPPHYS 207 (Win)

2020-21

- Classical Mechanics Laboratory: PHYSICS 42 (Aut, Spr)
- Electricity and Magnetism Lab: PHYSICS 44 (Win)
- Electricity, Magnetism, and Optics Laboratory: PHYSICS 24 (Win)
- Electronics and Introduction to Experimental Methods: PHYSICS 104 (Sum)
- Energy Options for the 21st Century: APPPHYS 79N (Aut)
- Laboratory Electronics: APPPHYS 207 (Win)
- Laboratory Electronics: APPPHYS 208 (Spr)
- Light and Heat Laboratory: PHYSICS 46 (Aut)
- Mechanics, Fluids, and Heat Laboratory: PHYSICS 22 (Aut)
- Modern Physics Laboratory: PHYSICS 26 (Spr)
