

Stanford

John Rick

Associate Professor of Anthropology, Emeritus

Bio

BIO

John Rick's research focuses on prehistoric archaeology and anthropology of hunter-gatherers and initial hierarchical societies, stone tool analysis and digital methodologies, Latin America, Southwestern U.S. Rick's major research efforts have included long-term projects studying early hunting societies of the high altitude puna grasslands of central Peru, and currently he directs a major research project at the monumental World Heritage site of Chavín de Huántar aimed at exploring the foundations of authority in the central Andes. Other field projects include work on early agricultural villages in the American Southwest, and a recently-initiated project on the Preclassic and Early Classic archaeology of the Guatemalan highlands near Panajachel, Atitlan. Current emphasis is on employing dimensional analytical digital techniques to the study of landscape and architecture, and on exploring the contexts and motivations for the development of sociopolitical inequalities.

ACADEMIC APPOINTMENTS

- Emeritus Faculty, Acad Council, Anthropology

PROFESSIONAL EDUCATION

- Ph.D., University of Michigan (1978)

Teaching

COURSES

2021-22

- Reading Group: ANTHRO 442 (Aut)
