Bio

BARBARA TVERSKY studied cognitive psychology at the University of Michigan. She held positions first at the Hebrew University in Jerusalem and then at Stanford, from 1978-2005 when she took early retirement. She is an active Emerita Professor of Psychology at Stanford and Professor of Psychology at Columbia Teachers College. She is a fellow of the Association for Psychological Science, the Cognitive Science Society, the Society for Experimental Psychology, the Russell Sage Foundation, and the American Academy of Arts and Science, and a recipient of the Kampe de Feriat Prize. She has been on the Governing Boards of the Psychonomic Society, the Cognitive Science Society, the International Union of Psychological Science, and the Association for Psychological Science. She has served on the editorial boards of many journals and the organizing committees of dozens of international interdisciplinary meetings.

Her research has spanned memory, categorization, language, spatial cognition, event perception and cognition, diagrammatic reasoning, sketching, creativity, design, and gesture. The overall goals have been to uncover how people think about the spaces they inhabit and the actions they perform and see and then how people use the world and the things in it, including their own actions and creations and those of others, to remember, to think, to create, to communicate. Her 2019 book, Mind in Motion: How Action Shapes Thought, overviews some of that work. She has collaborated widely, with linguists, philosophers, neuroscientists, computer scientists, chemists, biologists, architects, designers, and artists.

ACADEMIC APPOINTMENTS
- Emeritus Faculty, Acad Council, Psychology

BOARDS, ADVISORY COMMITTEES, PROFESSIONAL ORGANIZATIONS
- President, Association for Psychological Science, June 1, 2019 (2018 - present)

PROGRAM AFFILIATIONS
- Symbolic Systems Program

Publications

PUBLICATIONS
- Putting it Together, Together. *Cognitive science*
  Zheng, C., Tversky, B.
  2024; 48 (2): e13405

- A Testbed for Exploring Virtual Reality User Interfaces for Assigning Tasks to Agents at Multiple Sites
  Liu, J., Wang, C., Tversky, B., Feiner, S., Spencer, S. N.
  ASSOC COMPUTING MACHINERY, 2023
• Mind in Motion: How Action Shapes Thought
