Bio

BIO

Juliana Idoyaga, Ph.D., is an Adjunct Professor in the Department of Microbiology and Immunology at Stanford University School of Medicine, and an Associate Professor in the Departments of Pharmacology and Molecular Biology at the University of California, San Diego. Dr. Idoyaga studies the basic biology of dendritic cells and their applications towards therapeutics. In addition to her research, she is heavily committed to diversity, equity and inclusion in STEM, and the career development of undergraduate, graduate and postdoctoral trainees.

Dr. Idoyaga received her BSc in Biology and Immunology from the Buenos Aires University in Argentina. She then completed her PhD in Immunology and Biomedical Sciences with honors at the National Autonomous University of Mexico. She performed her postdoctoral training in the laboratory of Cellular Physiology and Immunology at The Rockefeller University under the mentorship of the late Nobel Laureate Dr. Ralph Steinman. She joined Stanford Faculty in July 2014. In addition to her faculty role, Dr. Idoyaga serves as the chair of the CDIII (Community, Diversity and Inclusion in Immunology) Committee, which has the important goal of promoting a culture of diversity, equity, inclusion and belonging in the Stanford Immunology Program. Dr. Idoyaga has received various awards including the NIH Pathway to Independence Award, the NIH Director's New Innovator Award, Baxter Foundation Faculty Scholar Award, and the Gabilan Faculty Fellow Award.

Dr. Idoyaga's research interests have spanned dendritic cell subset tissue localization, function, and the development of dendritic cell-targeted vaccines and therapies. The current areas of research in the Idoyaga Lab include: (1) unraveling dendritic cell heterogeneity in humans and tissues; (2) dissecting the origin and functional specialization of emerging dendritic cell subsets; and (3) harnessing the endowed function of dendritic cell subsets for immunotherapies and vaccines.

ACADEMIC APPOINTMENTS

- Asst Professor, Microbiology & Immunology
- Member, Bio-X
- Member, Maternal & Child Health Research Institute (MCHRI)
- Faculty Fellow, Sarafan ChEM-H
- Member, Stanford Cancer Institute

ADMINISTRATIVE APPOINTMENTS

- Chair, CDIII (Community, Diversity and Inclusion In Immunology) Committee, Stanford Immunology, Stanford University School of Medicine, (2020-2023)
- Member, Executive Committee, Stanford Immunology, Stanford University School of Medicine, (2020-2023)

HONORS AND AWARDS

- The Freidenrich BII Autoimmune Award, Translational and Clinical Innovation Award, Stanford University (2016-2017)
- NIH Director's New Innovator Award, NIH (2015-2020)
- Baxter Faculty Scholar Award, Baxter Foundation (2015)
- Gabilan Faculty Fellow, Stanford University (2014-2017)
- Pathways to Independence Award (K99/R00), NIH/NIAMS (2012-2017)
- PhD Fellowship, National Autonomous University of Mexico, Mexico. (2005-2007)
- Student Fellowship, Faculty of Sciences, University of Buenos Aires, Argentina (2002-2003)

PROFESSIONAL EDUCATION

- Postdoctoral Associate, The Rockefeller University, New York, USA , Cellular Physiology and Immunology (2012)
- Ph.D., National Autonomous University of Mexico , Immunology & Biomedical Sciences (2007)
- B.S., University of Buenos Aires, Argentina , Biology & Immunology (2004)

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

The Idoyaga Lab is focused on the function and biology of dendritic cells, which are specialized antigen-presenting cells that initiate and modulate our body's immune responses. Considering their importance in orchestrating the quality and quantity of immune responses, dendritic cells are an indisputable target for vaccines and therapies.

Dendritic cells are not one cell type, but a network of cells comprised of many subsets or subpopulations with distinct developmental pathways and tissue localization. It is becoming apparent that each dendritic cell subset is different in its capacity to induce and modulate specific types of immune responses; however, there is still a lack of resolution and deep understanding of dendritic cell subset functional specialization. This gap in knowledge is an impediment for the rational design of immune interventions. Our research program focuses on advancing our understanding of mouse and human dendritic cell subsets, revealing their endowed capacity to induce distinct types of immune responses, and designing novel strategies to exploit them for vaccines and therapies.

Teaching

COURSES

2022-23

- Cellular and Molecular Immunology: An Introductory Course: BIO 230, IMMUNOL 200, MI 200 (Aut)

2021-22

- Cellular and Molecular Immunology: An Introductory Course: BIO 230, IMMUNOL 200, MI 200 (Aut)

Hemmi, H., Idoyaga, J., Suda, K., Suda, N., Kennedy, K., Noda, M., Aderem, A., Steinman, R. M.
2009; 182 (3): 1278-1286
- **Cutting edge: Langerin/CD207 receptor on dendritic cells mediates efficient antigen presentation on MHC I and II products in vivo** *JOURNAL OF IMMUNOLOGY*
Idoyaga, J., Cheong, C., Suda, K., Suda, N., Kim, J. Y., Lee, H., Park, C. G.
2008; 180 (6): 3647-3650
- **Generation and application of new rat monoclonal antibodies against synthetic FLAG and OLLAS tags for improved immunodetection** *JOURNAL OF IMMUNOLOGICAL METHODS*
Park, S. H., Cheong, C., Idoyaga, J., Kim, J. Y., Choi, J., Do, Y., Lee, H., Jo, J. H., Oh, Y., Im, W., Steinman, R. M., Park, C. G.
2008; 331 (1-2): 27-38
- **Tumor cells prevent mouse dendritic cell maturation induced by TLR ligands** *CANCER IMMUNOLOGY IMMUNOTHERAPY*
Idoyaga, J., Moreno, J., Bonifaz, L.
2007; 56 (8): 1237-1250
- **Production of monoclonal antibodies that recognize the extracellular domain of mouse Langerin/CD207** *JOURNAL OF IMMUNOLOGICAL METHODS*
Cheong, C., Idoyaga, J., Do, Y., Pack, M., Park, S. H., Lee, H., Kang, Y., Choi, J., Kim, J. Y., Bonito, A., Inaba, K., Yamazaki, S., Steinman, et al
2007; 324 (1-2): 48-62
- **Innate NKT lymphocytes confer superior adaptive immunity via tumor-capturing dendritic cells** *JOURNAL OF EXPERIMENTAL MEDICINE*
Liu, K., Idoyaga, J., Charalambous, A., Fujii, S., Bonito, A., Mordoh, J., Wainstok, R., Bai, X. F., Liu, Y., Steinman, R. M.
2005; 202 (11): 1507-1516
- **Dendritic cells charged with apoptotic tumor cells induce long-lived protective CD4(+) and CD8(+) T cell immunity against B16 melanoma** *JOURNAL OF IMMUNOLOGY*
Goldszman, R. S., Idoyaga, J., Bravo, A. I., Steinman, R., Mordoh, J., Wainstok, R.
2003; 171 (11): 5940-5947
