Bio

ACADEMIC APPOINTMENTS

- Professor, Psychiatry and Behavioral Sciences
- Member, Maternal & Child Health Research Institute (MCHRI)
- Member, Wu Tsai Neurosciences Institute

ADMINISTRATIVE APPOINTMENTS

- Senior Associate Dean for Research, Stanford University School of Medicine, (2019- present)
- interim Senior Associate Vice Provost, Office of the Vice Provost and Dean of Research, (2019- present)
- 51st Committee on Committees, Member, (2018-2019)
- 50th-51st Stanford University Academic Senate, Member, (2017-2019)
- Vice Provost and Dean of Research, Search Committee, Member, (2017-2018)
- Associate Chair, Department of Psychiatry and Behavioral Sciences, (2016-2019)

HONORS AND AWARDS

- Editorial Selection, American Journal of Psychiatry, Outstanding Paper of the Year, American Journal of Psychiatry (2011)
- Invited Presenter, Presidential Symposium, American Psychiatric Association, Annual Meeting, Washington DC, May, 2012 (2012)
- Chair (Elected), Annual Meeting of the International College of Geriatric Psychoneuropharmacology, ICGP (2015)
- Chairman's Award for Leadership and Professionalism, Department of Psychiatry and Behavioral Sciences, Stanford University of School of Medicine (2015)
- Stanford Medal for Faculty Excellence in Fostering Undergraduate Research, Stanford University (2016)

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

The core of Dr. O'Hara's research is to investigate how cognitive information processing deficits subservise affective symptoms in psychiatric disorders, and interact with key brain networks integral to these disorders. Deficits in brain networks central to cognitive processing are prevalent in many psychiatric disorders. Findings across

neuropsychology and neuroimaging point to impairments that cross traditional diagnostic boundaries. These cognitive information processing dysfunctions manifest in regulatory problems in both traditional cognitive and emotional domains. They impact a patient's ability to engage effectively, persist in the face of symptomatically effective treatment, and are poorly targeted by current treatments. My body of research has played a key role in shifting the paradigm to defining, assessing and targeting psychiatric disorders more fully based on their cognitive information processing deficits, and underlying neurocircuitry. To do so, I have implemented a translational, interdisciplinary program that encompasses cellular models, brain (sleep, neuroimaging) and behavioral assays of affective and cognitive information processing systems in psychiatric disorders in order to: (1) interrogate the integral role of cognitive processing deficits in the development and exacerbation of affective and psychiatric symptoms; (2) characterize the role of cognitive deficits in treatment response and develop interventions to improve neuropsychiatric symptoms by enhancing cognitive information processing; and (3) identify the physiological bases of these cognitive and affective systems, including mapping cellular phenotypes to brain and behavioral phenotypes.

CLINICAL TRIALS

- Meru Health Ascend Mobile Intervention for Depression in Middle Aged and Older Adults, Recruiting
- Relaxation Treatment for Anxiety in Adults Aged 60 or Older, Not Recruiting

Teaching

COURSES

2019-20

- Autism Spectrum Disorder: HUMBIO 164 (Aut)

2018-19

- Autism Spectrum Disorder: HUMBIO 164 (Aut)

2017-18

- Autism Spectrum Disorder: HUMBIO 164 (Aut)

2016-17

- Autism Spectrum Disorder: HUMBIO 164 (Aut)
- The Physiology of Addiction in the Modern World: PSYC 83Q (Aut)
