### Bio

---

#### BIO

My research interests include nonalcoholic fatty liver disease (NAFLD) and viral hepatitis. I have focused my research to database analysis/outcomes and translational research in these areas. While database analysis has been critical in outlining trends in NAFLD and viral hepatitis epidemiology, translational research has provided insight into disease mechanism and future therapies. I collaborate with several basic science colleagues and act as clinical mentor for young investigators involved in translational research. I am also interested and act as adjunct faculty in biodesign and health policy. I have participated in several clinical trials as a co-investigator.
