## John Duchi

Associate Professor of Statistics, of Electrical Engineering and, by courtesy, of Computer Science

### Bio

---

#### BIO

John Duchi (<http://web.stanford.edu/~jduchi/>) is an assistant professor of Statistics and Electrical Engineering and (by courtesy) Computer Science at Stanford University. His work spans statistical learning, optimization, information theory, and computation, with a few driving goals. (1) To discover statistical learning procedures that optimally trade between resources--computation, communication, privacy provided to study participants--while maintaining good statistical performance. (2) To build efficient large-scale optimization methods that address the spectrum of optimization, machine learning, and data analysis problems we face, allowing us to move beyond bespoke solutions to methods that robustly work. (3) To develop tools to assess and guarantee the validity of--and confidence we should have in--machine-learned systems.

#### ACADEMIC APPOINTMENTS

- Associate Professor, Statistics
- Associate Professor, Electrical Engineering
- Associate Professor (By courtesy), Computer Science
- Member, Bio-X

#### HONORS AND AWARDS

- SIAM/OPT Early Career Prize, Society for Industrial and Applied Mathematics, Optimization Group (2020)
- Young Investigator Award, Office of Naval Research (2019)
- Best Paper Award, Neural Information Processing Systems (2017)
- Sloan Foundation Fellow in Mathematics, Sloan Foundation (2016)
- Doctoral Dissertation Award (Honorable Mention), Association for Computing Machinery (2015)
- Okawa Foundation Award, Okawa Foundation (2015)
- C.V. Ramamoorthy Distinguished Research Award, University of California, Berkeley (2014)
- Best Student Paper Award, International Conference on Machine Learning (2010)

#### PROFESSIONAL EDUCATION

- BS, Stanford University , Computer Science (2007)
- MS, Stanford University , Computer Science (2008)
- MA, University of California, Berkeley , Statistics (2012)
- PhD, University of California, Berkeley , EECS (2014)

## Research & Scholarship

---

### CURRENT RESEARCH AND SCHOLARLY INTERESTS

My work spans statistical learning, optimization, information theory, and computation, with a few driving goals: 1. To discover statistical learning procedures that optimally trade between real-world resources while maintaining statistical efficiency. 2. To build efficient large-scale optimization methods that move beyond bespoke solutions to methods that robustly work. 3. To develop tools to assess and guarantee the validity of—and confidence we should have in—machine-learned systems.

## Teaching

---

### COURSES

#### 2023-24

- Information Theory and Statistics: EE 377, STATS 311 (Aut)
- Introduction to Matrix Methods: ENGR 108 (Aut)
- Mathematics of Convexity: EE 364M (Win)
- Modern Applied Statistics: Learning: STATS 315A (Win)

#### 2022-23

- Applied Statistics I: STATS 305A (Aut)
- Introduction to Matrix Methods: ENGR 108 (Spr)

#### 2021-22

- Applied Statistics I: STATS 305A (Aut)
- Information Theory and Statistics: EE 377, STATS 311 (Aut)
- Theory of Probability: STATS 116 (Spr)

#### 2020-21

- Convex Optimization I: CME 364A, EE 364A (Win)
- Theory of Statistics II: STATS 300B (Win)

### STANFORD ADVISEES

Andy Dong

#### Doctoral Dissertation Reader (AC)

John Cherian, Isaac Gibbs

#### Doctoral Dissertation Advisor (AC)

Karan Chadha, Gary Cheng, Nicole Meister

#### Doctoral Dissertation Co-Advisor (AC)

Chen Cheng

#### Master's Program Advisor

Haoyi Duan, Sneha Jayaganthan, Yichen Jiang, Zixin Li, Yichun Qian, John Siddiqui
