### Bio

---

#### BIO

Dr. Elizabeth DiRenzo is a clinician scientist with a subspecialty interest in the behavioral assessment and treatment of laryngological disorders. She completed her undergraduate and clinical graduate degrees at Purdue University in West Lafayette, Indiana specializing in speech-language pathology. Following her clinical degrees, she remained at Purdue and earned a PhD in laryngeal physiology. She then completed postdoctoral training in the Department of Surgery, Division of Otolaryngology – Head & Neck Surgery at the University of Wisconsin-Madison studying vocal fold biology.

Clinically, Dr. DiRenzo is a practicing speech-language pathologist in the Stanford Voice and Swallowing Center. Her specific interests include the behavioral evaluation and treatment of patients with voice, resonance, upper airway, and swallowing disorders. In conjunction with her physician colleagues, Dr. DiRenzo has implemented a team-based patient assessment approach between laryngologists and speech-language pathologists and standardized multidimensional evaluation procedures to characterize normal and pathological voices for clinical and research purposes.

Dr. DiRenzo's research goal is to advance patient care and improve treatment outcomes through study of both normal laryngeal function and the pathophysiology of voice disorders. To achieve this overarching objective, Dr. DiRenzo's laboratory utilizes a highly collaborative, multifaceted approach consisting of basic science and clinical research techniques. Outside of work, she prioritizes spending time outdoors enjoying the beautiful California terrain with her husband Dan and their children Lucas and Clara.

#### ACADEMIC APPOINTMENTS

- Associate Professor - University Medical Line, Otolaryngology (Head and Neck Surgery)
- Associate Professor - University Medical Line (By courtesy), Music
- Member, Bio-X
- Member, Maternal & Child Health Research Institute (MCHRI)

#### HONORS AND AWARDS

- Diversity, Equity, & Inclusion Grant, Stanford Department of Otolaryngology (2021-)
- New Century Scholars Research Grant, American-Speech-Language-Hearing Foundation (2018-2020)

- Early Career Research Award R21, NIH-NIDCD (2017-2020)
- New Investigator Research Grant, American-Speech-Language-Hearing Foundation (2015)
- The Fall Voice Conference Travel Grant, National Spasmodic Dysphonia Association (2015)
- National Institutes of Health Extramural Loan Repayment Award for Clinical Research, National Institutes of Health (2013-)
- Meritorious Poster Submission, American Speech-Language-Hearing Association (2012)
- Third Place Poster Award, American Laryngological Society (2012)
- Alumni and Friends Award, Department of Speech, Language, and Hearing Sciences, Purdue University (2010)
- New Century Scholars Doctoral Scholarship, American-Speech-Language-Hearing Foundation (2010)
- Wilson Travel Scholarship, Department of Speech, Language, and Hearing Sciences, Purdue University (2010)
- Student Research Travel Award, American Speech-Language-Hearing Association (2009)
- Frederick N. Andrews Fellowship, Purdue Graduate School (2008)
- Outstanding Student Clinician in Speech-Language Pathology, Indiana Speech-Language-Hearing Association (2008)
- Travel Grant, Purdue Graduate Student Government (2008)
- Outstanding Student Clinician in Speech-Language Pathology, Indiana Lion's Club (2007)

## **BOARDS, ADVISORY COMMITTEES, PROFESSIONAL ORGANIZATIONS**

- Member, American Speech-Language-Hearing Association (ASHA) (2010 - present)
- Member, ASHA, Special Interest Group - 19: Speech Science (2018 - present)
- Member, ASHA, Special Interest Group - 3: Voice and Voice Disorders (2010 - present)
- Member, ASHA, Special Interest Group - 13: Swallowing and Swallowing Disorders (2014 - present)

## **PROFESSIONAL EDUCATION**

- Postdoctoral Fellowship, University of Wisconsin - Madison , Vocal Fold Biology (2014)
- Ph.D., Purdue University , Vocal Fold Physiology (2012)
- M.S., Purdue University , Speech Language Pathology (2008)
- B.S., Purdue University , Speech, Language, & Hearing Sciences (2006)

## **Research & Scholarship**

---

### **CURRENT RESEARCH AND SCHOLARLY INTERESTS**

The larynx is uniquely located at the divergence of the upper and lower airways and gastrointestinal tract. The vocal folds are housed within the larynx and are the only tissues in the human body that routinely vibrate at frequencies ranging from ~100-1000 Hz, in order to generate voice.

Voice disorders affect millions of people every year and have a devastating impact on communication and quality of life. I am a researcher and clinician with training and expertise in laryngeal physiology. I aim to advance patient care and improve treatment outcomes through study of both normal laryngeal function and the pathophysiology of voice disorders. In order to achieve this overarching objective, my laboratory utilizes a highly collaborative, multifaceted approach consisting of basic science and clinical research techniques.

My general basic science research focus is on laryngeal mucosal biology. In normal physiology, epithelial and mucus cells protect the laryngeal mucosa from the ~25 million pollutant, viral, and bacterial insults inhaled each day. Using a combination of ex vivo, in vivo, and in vitro experimental approaches, I examine the role of laryngeal epithelial and mucus cells as modulators of mucosal remodeling in injury and disease and defensive barriers between the external environment and the underlying tissue. Currently, we utilize exposure to tobacco products as a clinically relevant model of laryngeal injury.

My general clinical science research focus is evaluating clinical and quality of life outcomes in patients with voice disorders undergoing surgical or behavioral interventions. A major thrust of my clinical research has focused on identification of novel therapeutic options for essential vocal tremor (EVT). Specifically, I have targeted formation of a line of research dedicated to the development and refinement of deep brain stimulation (DBS) of the thalamus, a common surgical intervention for essential tremor of the limbs, as a treatment for EVT.
