Bio

BIO

Mary Beth Mudgett, the Stanford Friends University Fellow in Undergraduate Education, is the Senior Associate Dean for the Natural Sciences in the School of Humanities & Sciences. She received her doctorate in biochemistry at University of California, Los Angeles and has been a professor in Stanford's Department of Biology since 2002. Her research group studies plant-pathogen interactions, focusing on the biochemical mechanisms that pathogens use to manipulate the plant immune system resulting in disease outbreaks. As president of the International Society for Plant-Microbe Interactions, Mudgett launched a series of virtual symposia and platforms to enable networking on a global scale, while creating an inclusive environment to hear from the society's diverse stakeholders. Mudgett is also passionate about teaching and mentorship. She has launched new initiatives within biology to embrace different learning styles and enhance the student experience in the classroom. She also partners with faculty and staff across campus to increase student diversity within the natural sciences. In her prior role as Senior Associate Dean for Education Initiatives, Mary Beth has led an effort to reshape introductory science and math courses to better support students with different levels of preparation for success in STEM majors. She also has overseen an initiative to enhance undergraduate teaching, including a schoolwide mentorship program for junior faculty. As co-chair of Stanford's Academic Continuity Group, Mudgett helped the university blaze a path through the thicket of teaching challenges posed by the pandemic. She helped to solve problems involving online learning and curriculum development and to create the infrastructure and support needed for faculty, staff, and students to safely return to in-person instruction. In addition, she directed the Dean's Fellows Program, which provided teaching and research opportunities for graduate students completing their degrees and facing a job market made challenging by the pandemic. In her current role, she is dedicated to champion the core missions in research, teaching, and mentoring within the natural science community.

ACADEMIC APPOINTMENTS

- Associate Professor, Biology
- Professor, Biology
- Member, Bio-X

ADMINISTRATIVE APPOINTMENTS

- Senior Associate Dean of Natural Sciences, School of Humanities & Sciences, Stanford University, (2022- present)
- Senior Associate Dean, Educational Initiatives, School of Humanities & Sciences, Stanford University, (2019-2022)
- Adjunct Staff Scientist, Department of Plant Biology, Carnegie Institute of Science, (2016- present)

- Professor, Department of Biology, Stanford University, (2015- present)
- Associate Professor, Department of Biology, Stanford University, (2010-2015)
- Assistant Professor, Department of Biology, Stanford University, (2002-2009)

HONORS AND AWARDS

- Bass Fellow, Stanford Friends University Fellow in Undergraduate Education, Stanford University (2018-2022)
- Dean's Award for Distinguished Teaching, School of H&S, Stanford University (2017)
- Phi Beta Kappa Teaching Excellence Prize, PBK Northern Chapter (2017)
- Phi Beta Kappa Teaching Prize, Stanford University (2016)
- Excellence in Diversity, Bioscience Faculty Excellence Award, School of Medicine, Stanford University (2014)
- VPUE Faculty Scholar, Stanford University (2013-2014)
- Chambers Fellow, Stanford University (2011-2014)
- Teacher of the Year, Associated Students of Stanford University (2008)
- Hellman Faculty Scholar, Stanford University (2005-2006)
- Terman Fellow, Stanford University (2004-2010)
- National Research Service Award, National Institute of Health (1997-1999)
- Graduate Research Achievement Award, University of California, Los Angeles (1992)
- Graduate Teaching Assistant Award, University of California, Los Angeles (1990)

BOARDS, ADVISORY COMMITTEES, PROFESSIONAL ORGANIZATIONS

- Advisor, University Accreditation Advisory Committee, Stanford University (2022 - present)
- Chair, Execute Advisory Committee for Hopkins Marine Station, Stanford University (2021 - present)
- Member, Faculty Senate, Stanford University (2021 - present)
- Chair, Center for Teaching & Learning Director Search, Stanford University (2021 - 2021)
- Co-Chair, Summer Program Committee, Stanford University (2020 - present)
- Member, IDEAL Education Committee, Stanford University (2020 - present)
- Co-lead, Academic Continuity, Pandemic Response, Stanford University (2020 - 2022)
- Member, Policy Group for Pandemic Response, Stanford University (2020 - 2022)
- Advisor, VPUE Undergraduate Advisory Council, Stanford University (2019 - present)
- President, International Society for Molecular Plant-Microbe Interactions (2019 - 2022)
- Member, Committee on Committees, Stanford Academic Council, Stanford University (2019 - 2020)
- Member, Search Committee for Vice Provost of Undergraduate Education, Stanford University (2019 - 2020)
- Member, Faculty Senate, Stanford University (2018 - 2020)
- Member, First Year Experience Design Team, Long-range Planning, Stanford University (2018 - 2019)
- Member, Steering Committee, Stanford Academic Council, Stanford University (2018 - 2019)
- Chair, Natural Sciences Long-Range Planning, School of Humanities & Sciences, Stanford University (2017 - 2017)
- Member, Committee on Review of Undergraduate Majors (C-RUM), Stanford University (2016 - 2019)
- Reviewer, Biophysics IDP Graduate Program, School of Medicine, Stanford University (2016 - 2016)
- Reviewer, Immunology IDP Graduate Program, School of Medicine, Stanford University (2016 - 2016)
- Advisor, Advisory Committee for NIH IRACDA Postdoctoral Program, Stanford University (2015 - 2020)

- Director of Graduate Studies, Department of Biology, Stanford University (2015 - 2019)
- Member, Committee on Graduate Admissions and Policy, Bioscience Program, Stanford University (2014 - 2019)
- Member, Executive Committee, Biology Department, Stanford University (2014 - 2019)
- Fellow, ChEM-H: Chemistry, Engineering & Medicine for Human Health, Stanford University (2013 - present)
- Chair, Bioscience Diversity Advisory Council (BDAC), School of Medicine, Stanford University (2013 - 2020)
- Member, Steering Committee, NIH Biotech Predoctoral Training Program, Bioengineering, Stanford University (2013 - 2020)
- Member, Postdoctoral Mentoring Initiative Task Force, Stanford Biosciences, Stanford University (2013 - 2014)
- Member, Sustainable Funding Model Working Group, Stanford Biosciences, Stanford University (2013 - 2014)
- Participant, Vision & Change in Undergraduate Biology Education, National Science Foundation & AAAS (2013 - 2013)
- Board Member, International Society for Molecular Plant-Microbe Interactions (2012 - present)
- Member, Biology Graduate Studies Committee, Stanford University (2011 - 2019)
- Chair of Biology Graduate Admissions & Recruiting, Stanford University (2011 - 2014)
- Member, Faculty Senate, Stanford University (2011 - 2014)
- Editor, Frontiers in Plant-Microbe Interactions, Frontiers Journal (2010 - 2014)
- Specialty Chief Editor, Frontiers in Plant-Microbe Interactions, Frontiers Journal (2010 - 2014)
- Member, Committee on Research (C-Res), Stanford University (2010 - 2013)
- Chair & Board Member, Pierce's Disease/Glassy Wing Sharp Shooter Research Advisory Board, California Department of Food & Agriculture (2009 - 2014)
- Senior Editor, Molecular Plant Pathology, British Society for Plant Pathology (2009 - 2011)
- Advisor, Pre-Major Undergraduate Advisor, Stanford University (2007 - 2018)
- Advisor, Graduate Program Review, Department of Molecular & Cell Biology, Oregon State University (2006 - 2006)
- Associate Editor, Molecular Plant-Microbe Interactions, International Society for Plant-Microbe Interactions (2004 - 2005)
- Advisor, Annual Review of Plant Biology, Annual Reviews (2004 - 2004)
- Member, Biology Undergraduate Studies Committee, Stanford University (2003 - 2009)
- Advisor, Biology First Year Graduate Advising, Stanford University (2002 - present)
- Advisor, NSF US-EC Task Force on Biotechnology, National Science Foundation (2001 - 2001)
- Member, International Society of Plant-Microbe Interactions (1996 - present)

PROFESSIONAL EDUCATION

- Postdoctoral Scholar, University of California, Berkeley , Plant-Microbe Interactions (2001)
- Postdoctoral Scholar, University of California, Los Angeles , Biochemistry (1995)
- PhD, University of California, Los Angeles , Biochemistry (1994)
- BA, Ithaca College , Biochemistry (1989)

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

My laboratory studies the biochemical mechanisms used by bacterial pathogens to alter plant physiology during infection. Extensive genetic and phenotypic data indicate that the bacterial type three secretion (T3S) system and its protein substrates (referred to as T3S effectors) are the major virulence determinants that promote

pathogen colonization in plants. The paradigm for T3S effector function has been that these proteins collectively suppress host defense responses to promote colonization and disease progression. The biological function(s) of most T3S effectors, however, is extremely limited and biochemical support for this paradigm is lacking. Thus, the goal of our research has been to elucidate T3S effector function, identify host targets, and provide fundamental knowledge of how perturbation of distinct nodes in host signaling pathways leads to bacterial pathogenesis. To do so, we study the T3S effectors in *Xanthomonas euvesicatoria* (Xcv), a Gram-negative, facultative parasite that causes leaf spot disease in tomato and pepper. Understanding how plant innate immunity is regulated and how pathogens manipulate plant hosts is fundamental knowledge that is required for the development of novel strategies to prevent and/or eliminate plant disease in the field.

Currently, my group is investigating: 1) how *Xanthomonas* employs a transcription repressor to rewire host transcription during infection to alter immune signaling and growth programs; 2) how *Xanthomonas* effectors target 14-3-3 phospho-binding proteins to alter immune complexes and signaling; 3) the impact of *Xanthomonas*-mediated acetylation of host proteins that are involved with lipid signaling and microtubule dynamics; 4) how *Xanthomonas* uses a "default to death and defense strategy" to promote plant pathogenesis; and 5) unique natural products made during pathogen infection in tomato by applying a untargeted metabolomics in conjunction with transcriptomics to accelerate the discovery of new antimicrobial compounds and their biosynthetic pathways.
