

Stanford

Matthew Fitzgerald

Assistant Professor of Otolaryngology - Head & Neck Surgery (OHNS)
Otolaryngology - Head & Neck Surgery Divisions

Bio

BIO

I received my undergraduate degree in Communication Sciences and Disorders from The Wichita State University. I then traveled to Vanderbilt University to complete a M.S. in Audiology and Hearing Sciences, before completing a clinical fellowship at Henry Ford Hospital in Detroit, MI with Dr. Gary Jacobson. I subsequently completed a Ph.D. at Northwestern University in Communication Disorders with Dr. Beverly Wright exploring patterns of perceptual learning in individuals with normal hearing. Upon completion of my doctorate, I moved to the New York University School of Medicine for a post-doctoral fellowship in the Department of Otolaryngology. There, I worked with Dr. Mario Svirsky to identify recipients of cochlear implants who have not yet fully adapted to their device, and to provide tools which audiologists could use to modify the map to help these patients. I later joined the faculty at NYU, and also at Montclair State University. In 2015 I became the Chief of Audiology at Stanford, where I oversee the Audiology departments of both Stanford Hospital and the Lucille Packard Children's Hospital.

ACADEMIC APPOINTMENTS

- Assistant Professor - University Medical Line, Otolaryngology - Head & Neck Surgery Divisions
- Member, Maternal & Child Health Research Institute (MCHRI)

BOARDS, ADVISORY COMMITTEES, PROFESSIONAL ORGANIZATIONS

- Member, American Speech Language Hearing Association (1995 - present)
- Member, Association for Research in Otolaryngology (2005 - present)
- Member, American Auditory Society (2005 - present)
- Member, American Academy of Audiology (2015 - present)

PROFESSIONAL EDUCATION

- B.A., The Wichita State University , Communication Sciences and Disorders
- M.S., Vanderbilt University , Audiology and Hearing Sciences
- Ph.D., Northwestern University , Communication Sciences and Disorders

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

My research encompasses several translational projects. One focus is to modify the routine audiologic test battery such that it places equal weight on hearing acuity and hearing function. This work includes measures of speech in noise, or electrophysiologic responses such as the FFR. I also explore tools to better assess and maximize performance in users of hearing aids and cochlear implants. Finally, I am also investigating the benefits of telemedicine, and new treatments for tinnitus.

Teaching

COURSES

2021-22

- Seminar in Music Perception and Cognition I: MUSIC 351A (Aut)

2020-21

- Seminar in Music Perception and Cognition I: MUSIC 351A (Aut)

2019-20

- Seminar in Music Perception and Cognition I: MUSIC 351A (Aut)

2018-19

- Seminar in Music Perception and Cognition I: MUSIC 351A (Aut)
