Bio

BIO

I am clinically trained as a physician specialized in gastroenterology and hepatology. My research has focused on clinical research of nonalcoholic fatty liver disease (NAFLD) and obesity-related gastrointestinal diseases with a specific focus in population-based study. In addition, my research was not only focused on gastroenterology and was expanded to cardiology, endocrinology, and neurology (sleep medicine). I have experience with large epidemiologic cohort studies as well as clinical trials. This work has resulted in over 150 published papers, including major journal such as Gastroenterology, Hepatology, Gut, Journal of Hepatology, American Journal of Gastroenterology, etc. (as the first and corresponding author). These publications have been cited over 4000 times.
