## Salvatore Mancuso

Senior Data Engineer, Centers & Initiatives for Research, Curriculum, and Learning Experiences (CIRCLE)

### Bio

---

#### BIO

I am a connoisseur of extraordinary gizmos & lover of fine cheeses. I only moonlight as a data nerd at Stanford University.

#### CURRENT ROLE AT STANFORD

Sal heads the Data Team within the Data, Analytics, and Research Computing (DARC) group. He directs the harvesting, transformation, and systematic capture of extensive datasets into actionable and meaningful data for the faculty and researchers at the Graduate School of Business.

Sal's various roles at Stanford University have allowed him to work with researchers in multiple disciplines on tasks such as data collection, data processing, data visualizations, application/script development, and full-stack engineering. Previous to joining Stanford University, Sal worked for Tivo, Apple Computer, and Sun Microsystems. Sal received his degrees in corporate finance and economics from San Jose State University.
