Bio

BIO

Dr. Rashmi Bhandari joined the Pediatric Pain Management Clinic and Stanford faculty in 2005 and has since been working with children who have complex chronic pain conditions and their families. She is the Director of Psychology Services for the Pediatric Pain Clinic and oversees all aspects of clinical pain psychology services. In addition to practicing behavioral pain medicine for 12 years, Dr. Bhandari is the director of the pediatric pain psychology fellowship training. The education curriculum created for the pain psychology fellowship is now the leading standard in the field, educating future pediatric psychologists who want to specialize in pain medicine. Dr. Bhandari has extensive training in bio behavioral interventions for chronic pain such as biofeedback and is certified by the American Society of Clinical Hypnosis.

Dr. Bhandari is a committed clinician, educator, and researcher with a focus on assessment and development of treatment interventions to improve the lives of youth with chronic pain. Decisions about the appropriate treatments, however, are dependent on accurate and useful data—data that have been lacking for adults and children who experience chronic pain. This lack of information inspired the creation of a Health Registry/LHS called CHOIR. Dr. Bhandari helped lead the pediatric adoption of CHOIR, called Peds-CHOIR, which is a novel, open-source outcome-dual tracking vehicle for youth with chronic pain and their caregivers.

In recent years, Dr. Bhandari has researched evidenced-based treatments of pediatric chronic pain and identification of important patient characteristics that may inform treatment outcomes. Integral to this research was the utilization of Peds-CHOIR, which was designed to track outcomes for children and adolescents with chronic pain and their caregivers. Her publications in peer reviewed journals documents the development and implementation of this registry platform as well as the potential for deep phenotyping of treatment responsive and non-responsive patients.

CLINICAL FOCUS

- Psychology
- Pediatric Pain Psychology
- Pediatric Pain Rehabilitation

ACADEMIC APPOINTMENTS

- Clinical Associate Professor, Anesthesiology, Perioperative and Pain Medicine

ADMINISTRATIVE APPOINTMENTS

- Director of Pediatric Pain Psychology Services, Pediatric Pain Clinic at Stanford Children's Health, (2016- present)
- Director of Pediatric Psychology Training, Department of Anesthesia,, (2011- present)

PROFESSIONAL EDUCATION

- PhD Training: Wayne State University School of Medicine (2002) MI
- Professional Education: Yapko 100 Training in Hypnosis (2016) CA
- Professional Education: National Pediatric Hypnosis Training Institute (2014) MN
- Professional Education, American Society of Clinical Hypnosis , Clinical Hypnosis (2015)
- Professional Education, Stens Corporation , 5-Day Professional Biofeedback Certificate Program (2012)
- Fellowship: Wayne State University School of Medicine (2003) MI
- Internship: Wayne State University School of Medicine (2002) MI
