Khonika Gope is a Ph.D. student at the Stanford Technology Ventures Program in the Department of Management Science & Engineering at Stanford University.

Research Area: Innovation and Entrepreneurship

Research Abstract:

Broadly, Khonika Gope's research interests focus on strategy in innovative entrepreneurs. Particularly, she's interested in how institutions affect entrepreneurship and innovation, and is also interested in how power and politics play a role in top management teams in entrepreneurial firms.

Khonika received her BS in Electrical and Electronics Engineering from Bangladesh University of Engineering and Technology. She received her MBA from Goizueta Business School, Emory University, as a Fulbright Scholar. Prior to joining Stanford, she worked at as a lecturer and assistant professor at University of Dhaka's Institute of Business Administration, the leading business school in her home country, Bangladesh.
