#### BIO

Sean Follmer is an Associate Professor of Mechanical Engineering and Computer Science (by courtesy) at Stanford University. His Research in Human Computer Interaction, Haptics, and Human Robot Interaction explores the design of novel tactile physical interfaces and novel robotic devices. Dr. Follmer directs the Stanford Shape Lab and is a faculty member of the Stanford HCI Group. He is a core faculty member of the Design masters program focusing on innovation and human centered design at Stanford.

The Shape lab explores how we can interact with digital information in a more physical and tangible way. Towards our goal of more human centered computing, we believe that interaction must be grounded in the physical world and leverage our innate abilities for spatial cognition and dexterous manipulation with our hands. We develop advanced technologies in robotics, mechatronics, and sensing to create interactive, dynamic physical 3D displays and haptic interfaces that allow 3D information to be touched as well as seen. We are specifically interested in using these novel interfaces to support richer remote collaboration, computer aided design, education, and interfaces for people with visual impairments. In pursuit of these goals, we use a design process grounded in iterative prototyping and human centered design and look to create new understanding about human perception and interaction through controlled studies.

Our research in Human Computer Interaction and Human Machine Interaction currently directed the following areas:

- Shape Changing and Tangible User Interfaces
- Haptic Interaction
- Accessible User Interfaces for People who Are Blind and Visually Impaired
- Shape Changing Robotics
- Design and Debugging Tools for Physical Computing and Robotic Systems

Dr. Follmer received a PhD and a Masters from the MIT Media Lab in 2015 and 2011 (respectively) for his work in human-computer interaction, and a BS in Engineering with a focus on Product Design from Stanford University. His talk featured on TED.com was named one of the best science and tech TED talks of 2015 and has been viewed more than 1.5 million times. He has received numerous awards for his research and design work such as an Alfred P. Sloan Fellowship, NSF CAREER Award, Google Faculty Research Award, 17 Best Paper Awards and nominations from premier conferences in human-computer interaction (including Five Best papers at ACM UIST, Two Best Papers at ACM CHI and an IMWUT Distinguished Paper Award), Fast Company Innovation By Design Award, Red Dot Design Award, and a Laval Virtual Award. His work has been shown at the Smithsonian Cooper Hewitt Design Museum, Ars Electronica Center, and the Milan Design Week.

## ACADEMIC APPOINTMENTS

- Associate Professor, Mechanical Engineering
- Associate Professor (By courtesy), Computer Science
- Member, Bio-X
- Faculty Affiliate, Institute for Human-Centered Artificial Intelligence (HAI)

## HONORS AND AWARDS

- Best Paper Award, ACM CHI 2023 (2023)
- NSF CAREER Award, National Science Foundation (2022)
- Best Paper Award, ACM CHI 2021 (2021)
- Sloan Research Fellowship, Alfred P. Sloan Foundation (2021)
- Best Short Paper Award, ACM VRST (2019)
- Distinguished Paper Award, ACM IMWUT Volume 2 (2019)
- Best Paper Award, ACM UIST 2017 (2017)
- Google Faculty Research Award, Google (2017)
- Best Demo Award, ACM UIST 2016 (2016)
- Best Paper Award (x2), ACM UIST 2016 (2016)
- Google Faculty Research Award, Google (2016)
- Best Paper Award, ACM UIST 2013 (2013)
- Best Paper Award, ACM UIST 2012 (2012)

## PROGRAM AFFILIATIONS

- Symbolic Systems Program

## PROFESSIONAL EDUCATION

- Postdoctoral Associate, MIT Media Lab (2015)
- PhD, MIT Media Lab (2015)
- S.M., MIT Media Lab (2011)
