Bio

BIO

Dr. Dora Ho specializes in infection complications in immunocompromised patients, such as those with bone marrow transplant, solid organ transplant, cancers and other forms of immunodeficiency.

Dr. Ho did her PhD work in herpesvirus pathogenesis and postdoctoral research in CNS gene therapy with viral vectors at Stanford University. She further pursued training in Medicine and obtained her MD degree at Washington University, St Louis. She subsequently returned to the Bay Area and completed residency training at Santa Clara Valley Medical Center as well as fellowship training in Infectious Diseases at Stanford University School of Medicine. She joined the faculty of the Division of Infectious Diseases at Stanford in 2006. She is currently a Clinical Associate Professor and Associate Division Chief of Clinical Services. Since then, she has won a number of awards for her excellence in teaching and in patient care.

Besides her passion for patient care and clinical research, she is also a musician and has served as choir conductor, pianist and pipe organist in local churches.
