Vaishali Mittal

Postdoctoral Scholar, Dermatology

Bio

BIO

Vaishali Mittal, MD is a Postdoctoral Clinical Fellow in the Department of Dermatology at Stanford University under the guidance of Dr. Jean Y. Tang.

Her current research is focused on epidermolysis bullosa (EB), a group of rare diseases that cause the skin and mucous membranes to blister easily. She is involved in conducting long-term clinical trials examining the application of an autologous, gene-corrected keratinocyte sheet for the treatment of recessive dystrophic EB (RDEB). In addition, she is currently leading several research projects, including investigation of genotype-phenotype associations in multiple subtypes of EB, creation of an online platform for EB patients/families and investigators to collaborate together on research, and development of an online genetic registry for EB patients using a novel, home-based genetic testing kit.

Vaishali received her medical degree from Stanford University School of Medicine and completed her internship at Beth Israel Deaconess Medical Center/Brockton Hospital.

INSTITUTE AFFILIATIONS

- Member, Maternal & Child Health Research Institute (MCHRI)

STANFORD ADVISORS

- Jean Tang, Postdoctoral Faculty Sponsor
