

Stanford

Arcadia Falcone

Metadata Coordinator, Metadata Department

Bio

BIO

I manage metadata for resources in the Stanford Digital Library. My work includes designing and updating data models, developing tools and documentation, implementing standards and taxonomies, and advising content owners on how to ensure their materials are discoverable and accessible. I work with Metadata Services and Digital Library Systems and Services to continually advance Stanford's support for preserving and sharing both digital research outputs and library digital collections.

CURRENT ROLE AT STANFORD

Metadata Coordinator and Head, Metadata Design Unit

Metadata Services, Stanford Libraries
