Stanford

Shalmali Bane

Ph.D. Student in Epidemiology and Clinical Research, admitted Spring 2021

Bio

BIO

Shalmali Bane is doctoral student in the Department of Epidemiology and Population Health. She is a trainee with the Center for Population Health Sciences, in the Stanford School of Medicine. She works with Dr. Suzan Carmichael on examining social determinants of reproductive health and perinatal outcomes. Shalmali grew up in India and received a biology degree from Stanford, with a focus in Neurobiology. Prior to graduate school, she was a healthcare consultant with the Analysis Group, where she focused on survey research, literature reviews, and budget impact modelling. She is passionate about equity and inclusion initiatives and serves on her departmental JEDI committee. She hopes to meld all of these experiences together in her current work: applying rigorous epidemiological methods to study how factors like socially determined race/ethnicity and socio-economic position impact the experiences of birthing persons.

SERVICE, VOLUNTEER, AND COMMUNITY WORK

- Justice, Equity, Diversity, and Inclusion Committee, Department of Epidemiology and Population Health
- Home Program Department Representative, Stanford Biosciences Student Association

Research & Scholarship

LAB AFFILIATIONS

- Julia Simard (8/1/2021)
- Suzan Carmichael (10/1/2019)
