

Stanford

Emily Gwynn

Program Coordinator, Department of Energy Resources Engineering - Energy Resources Engineering

Bio

BIO

I have been with Stanford for 5 years. I began my career in Pediatric Hematology and Oncology at the School of Medicine in 2016. There I became a sustainability champion through My Cardinal Green with Sustainable Stanford, and moved to the Dean's Office at Stanford Earth in 2018. I currently work in Energy Resources Engineering at Stanford Earth, where I was re-hired in 2020, after taking some time off to care for my son, Miles. I am ecstatic for the opportunity to continue to work with Stanford Earth where I get to thoroughly enjoy practicing sustainability in my daily life.

CURRENT ROLE AT STANFORD

Program Coordinator in Energy Resources Engineering at Stanford Earth
