

## Y. Joyce Liao, MD, PhD

Associate Professor of Ophthalmology and of Neurology at the Stanford University Medical Center

### CLINICAL OFFICES

- **Stanford Byers Eye Institute**

2452 Watson Ct

MC 5353

Palo Alto, CA 94303

**Tel** (650) 723-6995      **Fax** (650) 565-8297

- **Stanford Byers Eye Institute**

2452 Watson Ct

MC 5353

Palo Alto, CA 94303

**Tel** (650) 723-6995      **Fax** (650) 565-8297

### ACADEMIC CONTACT INFORMATION

- **Alternate Contact**

Brianna Bennett - Administrative Assistant

**Email** [bdenyven@stanford.edu](mailto:bdenyven@stanford.edu)

**Tel** 650-725-9073

### Bio

---

#### BIO

Dr. Liao is a clinician-scientist who is dedicated to making basic discoveries and improving clinical care and treatment of patients with neuro-ophthalmic conditions (issues that affect vision due to nervous system issues). Dr. Liao received her undergraduate degree with high honors from Harvard University in Biochemical Sciences and her M.D., Ph.D. in Neuroscience (Medical Scientist Training Program) and Fellowship in Neuro-Ophthalmology from University of California San Francisco. She serves as the Director of the Neuro-Ophthalmology Service and Neuro-Ophthalmology Fellowship as well as Co-Director of the Vision Research Training Program. A major area of research is the understanding and treatment of human conditions that lead to retinal ganglion cell loss and irreversible thinning of the optic nerve, the only connection between the eye and the brain. This includes hypoxic-ischemic, autoimmune, and other causes. Hypoxic (loss of oxygen), ischemic (loss of blood flow) injury is common in all age groups and can occur as a result of perinatal asphyxiation in babies; near-drowning and poisoning in children; or cardiac arrest, stroke, pulmonary diseases, peri-operative complications, high altitude exposure, and space travel in adults. Dr. Liao uses animal model of HYPOXIA to study what happens to the optic nerve, retina, and brain in lower oxygen. In high altitude, some patients with selective vulnerability can develop ischemic optic neuropathy, which leads to irreversible vision loss. In prolonged space travel, the majority of astronauts develop optic nerve edema and retinal changes, which are of unclear mechanism but may be due to a combination of microgravity, hypoxic-ischemic injury, and other causes. Dr. Liao's group is also studying ANTERIOR ISCHEMIC OPTIC NEUROPATHY, the most common acute optic neuropathy in adults. Current research areas for optic neuropathies include: 1) Development of state-of-the-art in vivo optical, magnetic resonance imaging, and positron-emission tomography techniques in the eye and brain in humans and animal models of hypoxic-ischemic injury, in order to identify novel biomarkers that can help direct treatment; 2) Study of the cellular and subcellular changes to the retinal neurons, glia, axons and axonal transport following optic nerve injury; and 3) Development of highly promising treatment approaches for optic neuropathies and vision loss, including neuroprotection and regenerative therapy, in order to identify effective ways to treat human vision loss in the future.

A second major area of research is on clinical assessments of visual function and vision rehabilitation. Visual disability is significantly greater in almost all patients with neuro-ophthalmic conditions, because they impact daily activities such as driving, using a computer, and work. Dr. Liao founded the Stanford Human Ocular Motor Lab in 2006 and has 3 video infrared eye trackers that have been systematically used to measure eye behavior in hundreds of subjects with a variety of vision and eye movement issues. Her research focuses on how important visual function, such as reading and watching scenery (e.g. on TV), is affected by eye and brain diseases. The goal is that one day, she can use eye behavior to understand how different neuro-ophthalmic diseases impact visual function and to design better rehabilitation to help patients improve their visual function and quality of life. By recording and studying eye behavior during functional visual tasks like reading and watching a movie, which requires a combination of good vision and eye movement control, Dr. Liao hopes to decipher what contributes to visual dysfunction in the real world and design appropriate treatment and rehabilitation in the future.

## CLINICAL FOCUS

- Neuro-Ophthalmology
- Ischemic Optic Neuropathy
- Hypoxic-ischemic injury
- Stroke
- Parkinson's disease and parkinsonism
- Eye Movement Disorders
- Diplopia
- Stem cell
- Leber's hereditary optic neuropathy
- Optic Neuritis and Multiple Sclerosis
- Pseudotumor Cerebri
- Nystagmus
- Neurology
- Space travel

## ACADEMIC APPOINTMENTS

- Associate Professor - Med Center Line, Ophthalmology
- Associate Professor - Med Center Line, Neurology & Neurological Sciences
- Member, Bio-X
- Member, Maternal & Child Health Research Institute (MCHRI)
- Member, Wu Tsai Neurosciences Institute

## ADMINISTRATIVE APPOINTMENTS

- Director, Center for Optic Disc Drusen, Stanford University School of Medicine, (2019- present)
- Vice Chair for Academic Affairs, Stanford University Department of Ophthalmology, (2019- present)
- Director, Neuro-Ophthalmology, Stanford University Department of Ophthalmology, (2008- present)
- Director, Neuro-Ophthalmology Fellowship, Stanford University Department of Ophthalmology, (2017- present)
- Co-Director, Vision Postdoctoral Training Program, Stanford University Department of Ophthalmology, (2010- present)
- Director, Stanford Human Ocular Motor Center, Stanford University Department of Ophthalmology, (2006- present)
- Editorial Board, American Journal of Ophthalmology Case Report, (2020- present)

## HONORS AND AWARDS

- Faculty Educator of the Year, Department of Ophthalmology, Stanford (2020)
- Young Investigator Award, North American Neuro-Ophthalmology Society (2011)
- Grant Award, Weston Havens Foundation (2011-2013)
- McCormick Faculty Award, Office of Diversity and Leadership (2011-2013)
- Grant Award, Stanford University Vice Provost Undergraduate Research Faculty Grant (2010-2020)
- Career Award in Biomedical Sciences, Burroughs Wellcome Foundation (2005-2014)
- S. Weir Mitchell Award, American Academy of Neurology (2004)
- K08 Award, National Institute of Neurological Diseases and Stroke (2003-2008)

- Dean's Prize in Research, University of California, San Francisco (1992)

## **BOARDS, ADVISORY COMMITTEES, PROFESSIONAL ORGANIZATIONS**

- Member, Assistant Professor Review Committee, Stanford University School of Medicine (2018 - present)
- Member, Research Committee, North American Neuro-Ophthalmology Society (NANOS) (2018 - present)
- Member, Scientific Program Committee, North American Neuro-Ophthalmology Society (NANOS) (2015 - present)
- Member, Neuro-Ophthalmology subcommittee of Annual Meeting Program Committee, American Association of Ophthalmology (AAO) (2014 - present)
- Vice Chair and Board Member, California State Athletic Commission Medical Advisory Board (2010 - 2013)
- Member, Abstract Committee, North American Neuro-Ophthalmology Society (NANOS) (2008 - 2014)

## **PROFESSIONAL EDUCATION**

- Fellowship: UCSF Ophthalmology Fellowships (2006) CA
- Residency: Stanford University Neurology Residency (2002) CA
- Internship: Stanford University Internal Medicine Residency (1999) CA
- Medical Education: University of California at San Francisco School of Medicine (1998) CA
- A.B., Harvard , Biochemical Sciences (1991)
- Ph.D., UCSF , Neuroscience (1996)
- Board Certification: Neurology, American Board of Psychiatry and Neurology (2005)

## **Research & Scholarship**

---

### **CURRENT RESEARCH AND SCHOLARLY INTERESTS**

Ischemic optic neuropathy  
Stem cell transplantation  
Optic neuropathy  
Optic neuritis  
Eye movement disorders  
Reading  
Parkinson's disease  
Multiple sclerosis

### **CLINICAL TRIALS**

- Surgical Idiopathic Intracranial Hypertension Treatment Trial, Recruiting
- Clinical Study to Investigate the Long-term Safety, Tolerability, and Efficacy of Ponesimod in Patients With Relapsing-remitting Multiple Sclerosis, Not Recruiting
- Efficacy & Safety of RPh201 Treatment in Patients With Previous Nonarteritic Anterior Ischemic Optic Neuropathy (NAION), Not Recruiting
- Phase 2/3, Randomized, Double-Masked, Sham-Controlled Trial of QPI-1007 in Subjects With Acute Nonarteritic Anterior Ischemic Optic Neuropathy (NAION), Not Recruiting

- Study of Pasireotide in Patients With Rare Tumors of Neuroendocrine Origin, Not Recruiting
- Study to Assess the Efficacy and Safety of Raxone in LHON Patients, Not Recruiting

## PROJECTS

- Disease Pathogenesis and Treatment of Anterior Ischemic Optic Neuropathy - Stanford University (9/9/2008 - present)
- Eye Movement Control and Abnormalities in Neuro-Ophthalmic Conditions - Stanford University (9/9/2006 - present)
- Reading Difficulties in Parkinson's Disease (8/1/2015)
- Reading Abnormalities in Neuro-Ophthalmic Disorders (8/1/2006)
- Immunology and Vision Loss (8/1/2007)
- Human Non-Invasive Imaging and Recording of Brain Behavior (8/1/2006)
- Baseline Study - Stanford University, Duke University, Verily (2017)
- Low Vision Aids and Rehabilitation - Stanford University (6/1/2018)
- Eye-Brain Vision Issues in Space - Stanford University (January 1, 2018)

## Teaching

---

### STANFORD ADVISEES

#### Postdoctoral Faculty Sponsor

Louise Alessandra Mesentier Louro, Sangeethabalasri Pugazhendhi, Barbara Rangel da Silva

### GRADUATE AND FELLOWSHIP PROGRAM AFFILIATIONS

- Neurosciences (Phd Program)

2002; 176 (3): 184-187
- **Normal cerebellar development but susceptibility to seizures in mice lacking G protein-coupled, inwardly rectifying K<sup>+</sup> channel GIRK2** *PROCEEDINGS OF THE NATIONAL ACADEMY OF SCIENCES OF THE UNITED STATES OF AMERICA*  
Signorini, S., Liao, Y. J., Duncan, S. A., Jan, L. Y., Stoffel, M.  
1997; 94 (3): 923-927
- **Heteromultimerization of G-protein-gated inwardly rectifying K<sup>+</sup> channel proteins GIRK1 and GIRK2 and their altered expression in weaver brain** *JOURNAL OF NEUROSCIENCE*  
Liao, Y. J., Jan, Y. N., Jan, L. Y.  
1996; 16 (22): 7137-7150
- **Functional effects of the mouse weaver mutation on g protein-gated inwardly rectifying K<sup>+</sup> channels** *NEURON*  
Slesinger, P. A., Patil, N., Liao, Y. J., Jan, Y. N., Jan, L. Y., Cox, D. R.  
1996; 16 (2): 321-331
- **DISTINCT MORPHOGENETIC FUNCTIONS OF SIMILAR SMALL GTPASES - DROSOPHILA DRAC1 IS INVOLVED IN AXONAL OUTGROWTH AND MYOBLAST FUSION** *GENES & DEVELOPMENT*  
Luo, L. Q., Liao, Y. J., Jan, L. Y., Jan, Y. N.  
1994; 8 (15): 1787-1802
- **PRESYNAPTIC A-CURRENT BASED ON HETEROMULTIMERIC K<sup>+</sup> CHANNELS DETECTED IN-VIVO** *NATURE*  
Sheng, M., Liao, Y. J., Jan, Y. N., Jan, L. Y.  
1993; 365 (6441): 72-75
- **HUMAN FETAL LIVER GAMMA/DELTA T-CELLS PREDOMINANTLY USE UNUSUAL REARRANGEMENTS OF THE T-CELL RECEPTOR DELTA-LOCI AND GAMMA-LOCI EXPRESSED ON BOTH CD4<sup>+</sup>CD8<sup>-</sup> AND CD4<sup>-</sup>CD8<sup>-</sup> GAMMA/DELTA T-CELLS** *JOURNAL OF EXPERIMENTAL MEDICINE*  
Wucherpennig, K. W., Liao, Y. J., Prendergast, M., Prendergast, J., Hafler, D. A., STROMINGER, J. L.  
1993; 177 (2): 425-432

## PRESENTATIONS

- Eyes - the Window to Your Health (Project Baseline Lecture) - Stanford University
- Eye-Brain Issues in Microgravity and the Effect of Hypoxia in COVID-19 Infection - American Institute of Aeronautics and Astronautics Los Angeles-Las Vegas Section (April 18, 2020)
- Vision Issues in Parkinson's Disease - Parkinson's Institute
- Hot Topics in Eye-Brain Diseases - Moran Eye Center
- Brain and eye edema and dysfunction in space travel - American Institute of Aeronautics and Astronautics (AIAA) Los Angeles-Las Vegas Mini-Conference
- Eye Problems in Acoustic Neuroma - 2019 Acoustic Neuroma Society Meeting
- Profiling Health Changes in Prolonged Space Travel Using Proteomics - International Space Station Research and Development Meeting (<https://www.issconference.org>)

- Eye-brain issues in microgravity - The Space Show (May 31, 2020)
