Bio

BIO

Dr. Vinicio de Jesus Perez received his MD from the University of Puerto Rico Medical School and completed an internal medicine residency at Massachusetts General Hospital. He completed a fellowship in pulmonary and critical care medicine in Denver, followed by postdoctoral research training at Stanford University. He focused on researching genetic and molecular mechanisms of pulmonary hypertension (PH) and idiopathic pulmonary fibrosis (IPF) and has devoted his clinical practice to diagnosis and management of these conditions. He is presently assistant professor of medicine and staff physician of the Stanford Adult PH Clinic where he trains fellows pursuing careers in PH and IPF. He is principal investigator of a research program with the ultimate goal of identifying new therapeutic targets to treat PH and IPF.

As a medical professional belonging to a minority group, Dr. de Jesus Perez is involved in academic endeavors seeking to improve access of care for patients with disadvantaged ethnic backgrounds and promote diversity in medicine.

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

My work is aimed at understanding the molecular mechanisms involved in the development and progression of pulmonary arterial hypertension (PAH). I am interested in understanding the role that the BMP and Wnt pathways play in regulating functions of pulmonary endothelial and smooth muscle cells both in health and disease.

PROJECTS

- Use of Next Generation Sequencing to Accelerate Discovery of Novel Gene Modifiers associated with Pulmonary Arterial Hypertension. - Stanford University, Hospital Universitario La Paz (Madrid) (September 1, 2017 - present)

- The role of versican in the pathobiology of pulmonary arterial hypertension - Stanford University, Lund University, Karolinska Institute (January 1, 2017 - present)
- Pulmonary Hypertension Education in Puerto Rico - Stanford University, University of Puerto Rico Medical Sciences (January 1, 2017 - present)
- A combined genetic and proteomic approach to identify novel gene modifiers in PAH. - Stanford University, University of Graz (December 1, 2016 - present)
