Bio

BIO

Dr. Bassett is a Clinical Associate Professor in the Division of Pediatric Hospital Medicine. She completed her pediatric residency as well as her pediatric hospital medicine fellowship at Stanford University. She has a background in quality and process improvement, and is involved in several institution-wide efforts to promote high-value care and reduce unnecessary variation in clinical medicine. She is the Physician Lead for Acute Care Services for the Clinical Effectiveness Program at LPCHS, and is the co-director of the Packard Clinical Pathways Program. Her research focuses on understanding and implementing high value care in the inpatient pediatric setting, with a special focus on real time patient- or family-centered healthcare cost transparency in the acute setting. She is interested not only in patient and clinician perspectives on discussion of costs at the point-of-care, but also in developing patient-facing transparency tools that can be used in the acute setting to study their impact on patient, clinician, and system-level outcomes.

CLINICAL FOCUS

- Pediatric Hospital Medicine

ACADEMIC APPOINTMENTS

- Clinical Associate Professor, Pediatrics
- Member, Maternal & Child Health Research Institute (MCHRI)

PROFESSIONAL EDUCATION

- Board Certification: Pediatric Hospital Medicine, American Board of Pediatrics (2022)
- BA, Emory University, Neuroscience and Behavioral Biology (2009)
- Residency: Stanford Health Care at Lucile Packard Children's Hospital (2016) CA
- Medical Education: University of New Mexico School of Medicine (2013) NM
- Fellowship: Stanford Pediatric Hospital Medicine Fellowship (2018) CA
- Board Certification: Pediatrics, American Board of Pediatrics (2016)

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

Understanding how to implement real time patient-centered healthcare cost transparency in the acute care setting and how this transparency effects patient and system-level outcomes.

Understanding how to best decrease unnecessary variation in clinical care through implementation of clinical effectiveness tools.
