

Stanford

Nirao Shah

Professor of Psychiatry and Behavioral Sciences (Major Laboratories and Clinical Translational Neurosciences Incubator), of Neurobiology and, by courtesy, of Obstetrics and Gynecology

Bio

BIO

Dr. Nirao Shah is a Professor of Psychiatry and Behavioral Sciences and of Neurobiology at Stanford University. After completing his medical training, Nirao was a graduate student at Caltech, where he identified mechanisms that control differentiation of stem cells that give rise to the peripheral nervous system. For his post-graduate fellowship at Columbia University, Nirao developed genetic approaches to identify neural pathways that regulate social behaviors. In his own laboratory, his research has elaborated on such approaches to identify genes and neurons that control different aspects of social interactions. Nirao's findings have provided insights into how our brains enable social interactions in health, and they are relevant to understanding mechanisms underlying behavioral manifestations of autism, dementia, mood disorders, and PTSD.

ACADEMIC APPOINTMENTS

- Professor, Psychiatry and Behavioral Sciences
- Professor, Neurobiology
- Professor (By courtesy), Obstetrics & Gynecology
- Member, Bio-X
- Faculty Fellow, Sarafan ChEM-H
- Member, Wu Tsai Neurosciences Institute

ADMINISTRATIVE APPOINTMENTS

- Director of Neurosciences Graduate Program, School of Medicine, (2019- present)

HONORS AND AWARDS

- Scholar in Neuroscience, Ellison Medical Foundation (2012)
- Byers Award, UCSF (2010)
- Pioneer Award, NIH (2009)
- Young Investigator Award, NARSAD (2009)
- Mallinckrodt Scholar, Edward Mallinckrodt, Jr. Foundation (2008)
- Kavli Fellow, German American Frontiers of Science Foundation (2006)
- Alfred P. Sloan Fellow, Sloan Foundation (2005)
- Scholar, McKnight Endowment Fund for Neuroscience (2005)
- Career Award in Biomedical Sciences, Burroughs Wellcome Fund (2000)
- Fellow, Jane Coffin Childs Memorial Fund for Medical Research (1997)

PROFESSIONAL EDUCATION

- Fellow, Columbia University , Neural Circuits & Behavior (2003)
- Ph.D., Caltech , Stem Cells (1997)
- Clinical Internship, Seth G.S. Medical College & K.E.M. Hospital, Mumbai , Medicine (1991)
- M.B.,B.S., Seth G.S. Medical College & K.E.M. Hospital, Mumbai , Medicine (1990)

PATENTS

- David Anderson, Nirao Shah. "United States Patent 6,001,654 Methods for differentiating neural stem cells to neurons or smooth muscle cells using TGF- β super family growth factors", Caltech, Dec 14, 1999

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

We study how our brains generate social interactions that differ between the sexes. Such gender differences in behavior are regulated by sex hormones, experience, and social cues. Accordingly, we are characterizing how these internal and external factors control gene expression and neuronal physiology in the two sexes to generate behavior. We are also interested in understanding how such sex differences in the healthy brain translate to sex differences in many neuro-psychiatric illnesses.

Teaching

COURSES

2021-22

- Neurogenetics Core: NEPR 213 (Aut)

2020-21

- Neurogenetics Core: NEPR 213 (Aut)

STANFORD ADVISEES

Doctoral Dissertation Reader (AC)

Lucas Encarnacion-Rivera, Ellen Gingrich, Josh Head, Neil Khosla, Ethan Richman

Postdoctoral Faculty Sponsor

Lele Cui, Dan Landayan, Vinicius Miessler de Andrade Carvalho, Sakura Tanaka, Yichao Wei, Renzhi Yang

Doctoral Dissertation Advisor (AC)

Leonardi Gozali

GRADUATE AND FELLOWSHIP PROGRAM AFFILIATIONS

- Endocrinology (Fellowship Program)
- Neurosciences (Phd Program)
