## Research & Scholarship

### CURRENT RESEARCH AND SCHOLARLY INTERESTS

Maintaining and optimizing upper limb function in people with spinal cord injury and other nerve disorders.

We are looking at different treatment modalities from tendon transfers to nerve transfers. We are assessing issues with access to care and optimizing surgical outcomes

Improving pain and general well being after severe hand injuries.

Improving treatment and recognition of pain.

We are using big data to assess what are the factors associated with reduced pain. We are interested in developing guidelines for surgeons on the best strategies to reduce post operative pain.

### CLINICAL TRIALS

- Evaluation of NEUROCAP® In the Treatment of Symptomatic Neuroma, Recruiting
- Supporting Patient Decisions About UE Surgery in Cervical SCI, Recruiting
- Use of PET/MR Imaging in Chronic Pain, Recruiting
- [18F]FTC-146 PET/MRI in Healthy Volunteers and in CRPS and Sciatica, Not Recruiting
