Bio

BIO

Dr. Shomali is a clinical assistant professor of Hematology at Stanford University School of Medicine. He is board certified in hematology & medical oncology.

Dr. Shomali specializes in the treatment of blood cancers such as myeloproliferative neoplasms and myelodysplastic syndromes. He aims to provide compassionate, personalized, and evidence-based care to each patient.

Dr. Shomali received his medical degree from the University of Jordan, followed by a postdoctoral fellowship at MD Anderson Cancer Center where he studied infections in cancer patients and the role of biomarkers in defining tumor fever. He completed his residency training in Internal Medicine at the Cleveland Clinic Foundation where he served as a Chief Medical Resident. He then joined Stanford University for his combined Hematology & Oncology fellowship training.

Dr. Shomali's research interests include the study of novel agents in myeloproliferative neoplasms and myelodysplastic syndromes. He developed investigator-initiated clinical trials for patients with eosinophilic neoplasms and advanced myelofibrosis. In addition, he co-authored several papers and book chapters discussing the care of patients with cancer. His work has been presented in national meetings and published in peer reviewed journals including Blood, American Journal of Hematology, British Journal of Hematology, Leukemia & Lymphoma, and Cancer.

Among his honors, Dr. Shomali received the Cleveland Clinic Excellence in Teaching Award and was named to the Alpha Omega Alpha Medical Honor Society. He has received a Young Investigator Award from the Conquer Cancer Foundation, an NIH Institutional National Research Service Award, and a Stanford Cancer Institute Fellowship Award.

Dr. Shomali is a member of the American Society of Hematology and the American Society of Clinical Oncology.
