Bio

BIO

Dr. Elizabeth Bailey is a Clinical Associate Professor of Dermatology at Stanford and serves as Program Director for the Stanford Dermatology Residency Program, Associate Clinic Chief of Medical Dermatology at Stanford Healthcare, and Director of Global Health Dermatology.

She has a passion for thinking about how we communicate and how we can leverage relationships to improve how we communicate and work as a team in an inclusive and supportive environment. She loves thinking about this in the context of developing relationships with patients to help them achieve the best possible outcomes and in the context of helping our clinical teams perform to the best of their abilities. She also enjoys discovering ways to teach and learn these skills at all stages of medical education. Her work has included a project using art to cultivate communication skills, research on curriculum needs and opportunities to integrate educational content related to sexual and gender minority and skin of color in dermatology residency education, and ongoing work on communication skills training in dermatology residency education.

Dr. Bailey graduated magna cum laude from Harvard University and received her medical degree from Columbia University in New York, where she was a member of the Alpha Omega Alpha honor society. She completed her internship in internal medicine at Brigham and Women's Hospital in Boston, and completed both her residency in dermatology and fellowship in dermatopathology at Stanford University Medical Center. She is board certified in dermatology and dermatopathology by the American Boards of Dermatology/Pathology.

Dr. Bailey's academic interests include medical education, community outreach, global health, and skin cancer detection and prevention.
