BIO

Claude M. Nagamine, DVM, PhD Associate Professor received his D.V.M. from the University of Tennessee in 2004 and completed his residency training in Laboratory Animal Medicine at the Massachusetts Institute of Technology in 2007. He joined the Department of Comparative Medicine at Stanford in 2008. Prior to entering veterinary school, Dr. Nagamine obtained a Ph.D. in Ecology from the University of California, Davis (1979), obtained postdoctoral training in endocrinology, developmental genetics, immunology, and molecular biology of the mouse at the Memorial Sloan-Kettering Cancer Center (NYC), Institut Pasteur (France), and the Howard Hughes Medical Institute at the University of California, San Francisco and was an Assistant Professor of Cell Biology at the Vanderbilt University School of Medicine. His research focuses on using mouse models to study murine and human infectious diseases. These collaborative studies include dengue virus, zika virus, adeno-associated virus, coxsackie virus, enterovirus 71, enterohepatic helicobacters, campylobacters, and anaplasma.
