## Yasir Sepah

Assistant Professor (Research) of Ophthalmology

### Bio

---

#### BIO

Yasir J Sepah is an Assistant Professor at the Byers Eye Institute with a decade of experience in drug repositioning, development of biomarkers and multicenter clinical trials. He completed his medical education at The Aga Khan Medical College, Karachi, Pakistan. He completed his postdoctoral studies in ophthalmic imaging and clinical trials at the Wilmer Eye Institute, Johns Hopkins University, and a BioDesign fellowship at the Stanford Center for Biodesign.

Yasir Sepah is internationally known for his innovative approaches to low-cost, investigator sponsored, first in-human clinical trials that has put several molecules on track for regulatory approval. He also develops biomarkers and methods to identify early disease and objectively assess response to therapy and has recently developed an imaging method (image guided microperimetery) that can potentially allow a paradigm shift in how we assess disease progression in age related macular degeneration, inherited retinal degenerations and diabetic macular ischemia .

#### ACADEMIC APPOINTMENTS

- Assistant Professor (Research), Ophthalmology

#### ADMINISTRATIVE APPOINTMENTS

- Co-Founder, Crest Trials, (2022- present)
- Co-Founder, Ocular Imaging Research & Reading Center, (2016- present)

#### BOARDS, ADVISORY COMMITTEES, PROFESSIONAL ORGANIZATIONS

- Associate Member, American Academy of Ophthalmology (2012 - present)
- Associate Member, Association for Research in Vision and Ophthalmology (2010 - present)
- Executive Board Member, Foster Ocular Immunology Society (2014 - present)

### Research & Scholarship

---

#### CURRENT RESEARCH AND SCHOLARLY INTERESTS

Yasir's primary focus is on early identification of ocular diseases and objective assessment of response to therapy via biomarker (imaging and molecular) discovery and endpoints development for clinical trials. His lab is also developing and implementing protocols and methods to make decentralized clinical trials in ophthalmology viable.

Yasir is also engaged in developing low-tech, low cost and less intelligent solutions in order to improve patient's access to care.
