

Stanford

Gee, Leland B.

Staff Scientist, SLAC National Accelerator Laboratory

Bio

BIO

Skills in spectroscopy with numerous spectroscopic techniques: Fourier-transform infrared spectroscopy, electron paramagnetic resonance, Fe-57 Mössbauer spectroscopy, X-ray magnetic circular dichroism, Ni-61 Mössbauer spectroscopy, XAS, XES, RIXS, EXAFS, and nuclear resonance vibrational spectroscopy. With a special focus on applying these approaches to bioinorganic systems.

Launched a website in 2015 called www.spectra.tools, aimed to make a repository of web-driven spectroscopy tools and information. With the hope that these spectroscopic methods and computational tools become more accessible to others.

Research interests currently include: Design of artificial metalloenzymes for gas transformation chemistry; photochemistry of nitric-oxide release from transition metals toward biomedical applications; and applications of advanced learning towards X-ray spectroscopy.

CURRENT ROLE AT STANFORD

The lead instrument scientist for the MFX instrument at the LCLS (at the SLAC National Accelerator Laboratory). Coordinator of the Bioinorganic Research Group with membership that spans multiple directorates at SLAC. Leader of an HPC project at NERSC to increase accessibility to the analysis of spectroscopic data, XSIM: "Computational simulations of advanced X-ray spectroscopy on biological metallocofactors".

Member of the NIH P41 Center for Structural Dynamics in Biology.

HONORS AND AWARDS

- Educational Committee Travel Award, Biophysical Society (2016)
- Graduate Student Research Award, UC Davis and Humanities (2015)
- Mössbauer Young Scientist Award, International Board on the Applications of the Mössbauer Effect (9/9/2021)

EDUCATION AND CERTIFICATIONS

- Ph.D., University of California, Davis , Biophysics (2016)
- B.S., University of California, Davis , Biochemistry/Molecular Biology (2011)
- B.A., University of California, Davis , Economics (2011)

PROJECTS

- Development of Photosynthetic Methane and Hydrogen Transforming Biohybrid Platforms
- Photomechanistic insights into NO- and HNO-evolving redox non-innocent metal-nitrosyl complexes

LINKS

- spectra.tools: <https://www.spectra.tools>
- Google Scholar: https://scholar.google.com/citations?hl=en&user=ICFW4MAAAAAAJ&view_op=list_works&sortby=pubdate
- ResearchGate: https://www.researchgate.net/profile/Leland-Gee?ev=hdr_xprf

Professional

WORK EXPERIENCE

- NIH Ruth L. Kirschstein National Research Service Award Postdoctoral Fellow - Stanford University
- Laboratory Supervisor / Software Engineer - Crocker Nuclear Laboratory, University of California, Davis
- Neurobiology Research Intern - Neurobiology, Physiology and Behavior Department, UC Davis, Davis, CA

PROFESSIONAL AFFILIATIONS AND ACTIVITIES

- Member, Biophysical Society (2013 - present)
- Member, American Chemical Society (2014 - present)
- Member, Coblenz Society (2014 - present)
- Member, Society for Applied Spectroscopy (2014 - present)
- Leader, XSIM – NERSC High Performance Computing Project – "Computational simulations of advanced X-ray spectroscopy on biological metallocofactors" (2017 - present)
- Textbook Proposal Reviewer, Elsevier (2018 - 2018)
- X-ray User Proposal Reviewer, SSRL, SLAC (2018 - present)
- Dissertation Committee Member, Dept. of Chemistry, University of California, Davis (2019 - 2019)
- Member, American Association for the Advancement of Science (2020 - present)
