Bio

BIO

Dr. Sunwoo was born and raised in St. Louis, Missouri. He received his undergraduate degree from Brown University in Providence, Rhode Island and his medical degree from Washington University in St. Louis, Missouri. He completed his training in Otolaryngology – Head and Neck Surgery at Washington University. Dr. Sunwoo has been at Stanford University since 2008, and his clinical focus is on the surgical management of head and neck cancer, specifically focusing on melanoma and neoplasms of the thyroid and parathyroid glands. He is a member of the Pigmented Lesions and Melanoma Clinic and the Melanoma Working Group at Stanford. He is also the co-founder of the Stanford Thyroid and Parathyroid Tumor Board.

In addition to his clinical work, Dr. Sunwoo is the Director of Head and Neck Cancer Research at Stanford University and the principal investigator of an NIH-funded laboratory in the Stanford Cancer Institute. His research is focused on three primary areas: (1) the immune response to cancer, particularly a tumorigenic population of cells within malignancies called cancer stem cells; (2) the biology and developmental programs of a special lymphocyte population involved in innate immunity called natural killer (NK) cells; and (3) intra-tumor and inter-tumor heterogeneity in head and neck cancer.

CLINICAL FOCUS

- Cancer > Cutaneous (Dermatologic) Oncology
- Cancer > Head and Neck Cancer
- Melanoma
- Thyroid Neoplasms
- Parathyroid Neoplasms
- Tongue Neoplasms
- Otolaryngology - Head & Neck Surgery (Ear, Nose and Throat)
- Otolaryngology
- Thyroid Nodule
- Parotid Neoplasms
- Cancer of the Salivary Gland

ACADEMIC APPOINTMENTS

- Professor, Otolaryngology - Head & Neck Surgery Divisions
- Professor (By courtesy), Dermatology
- Member, Bio-X

- Member, Stanford Cancer Institute

ADMINISTRATIVE APPOINTMENTS

- Leader, Head and Neck Cancer Service Line (CCP), Stanford Cancer Institute, (2017- present)
- Director of Head and Neck Cancer Research, Stanford University School of Medicine, Dept. of Otolaryngology, (2013- present)
- Co-Director, Thyroid and Parathyroid Tumor Board, Stanford University School of Medicine, (2011- present)
- Member, Pigmented Lesion and Melanoma Program, Stanford University School of Medicine, (2011- present)
- Member, Metastatic and Recurrent Head and Neck Disease Task Force, Head and Neck Steering Committee of the National Cancer Institute, NIH, (2011-2017)
- Member, Research Committee, American Head and Neck Society, (2010-2013)
- Member, Tumor Biology & Imaging Task Force, Head and Neck Steering Committee of the National Cancer Institute, NIH, (2010-2011)
- Member, CORE Grants Study Section, American Academy of Otolaryngology # Head and Neck Surgery, (2009- present)

HONORS AND AWARDS

- Top Doctors, Castle Connolly (2013 - present)
- Faculty Teacher of the Year, Dept. of Otolaryngology, Stanford University (2012)
- Best Doctors in America, Best Doctors, Inc. (2009-present)
- K08 Award, National Institutes of Health (2004)
- Alpha Omega Alpha, Washington University (2003)
- Chief Resident Teaching Award, Washington University (2003)
- Young Investigator Award, American Head and Neck Society (2000)
- Resident Research Award, Washington University (1997, 1999, 2000)
- Louis and Dorothy Kovitz Prize in Surgery, Washington University (1993)
- Sigma Xi, Brown University (1989)

PROFESSIONAL EDUCATION

- Postdoc Research Fellowship, Washington University , Immunology (2008)
- Residency: Washington University School Of Medicine (2003) MO
- Medical Education: Washington University School Of Medicine (1993) MO
- Board Certification: Otolaryngology, American Board of Otolaryngology (2004)
- Fellowship: National Institutes of Health (2000) MD
- M.D., Washington University , Medicine (1993)
- Sc.B., Brown University , Biochemistry (1989)

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

My laboratory is focused on two primary areas of research: (1) the immune response to head and neck cancer and to a tumorigenic population of cells within these malignancies called cancer stem cells; (2) the developmental programs of a special lymphocyte population involved in innate immunity called natural killer (NK) cells; and (3) intra-tumor and inter-tumor heterogeneity.

The overarching goal of my laboratory is to understand how NK cells, in the broader context of the host immune system, protect against developing and metastasizing tumor cells, especially a rare population of tumor-initiating cells called cancer stem cells. These tumorigenic cells have been isolated from a number of solid tumor

malignancies, including human head and neck cancer. Heterogeneity of immune potency between individuals with these malignancies is well accepted but poorly understood. The work in my laboratory will address the questions of how and why the immune system can respond to and control malignant cells in some contexts but not in others. Clarity of the underlying basis for these differences would potentially explain why certain individuals are more susceptible to cancer, lead to better screening strategies, and ultimately provide much needed insight into how the host immune system can be manipulated to control cancer.

CLINICAL TRIALS

- Identification and Characterization of Novel Proteins and Genes in Head and Neck Cancer, Recruiting
- Identification of Secreted Markers for Tumor Hypoxia in Patients With Head and Neck or Lung Cancers, Recruiting
- Phase I Panitumumab IRDye800 Optical Imaging Study, Recruiting
- Study to Evaluate Immunological Response to PD-1 Inhibition in Squamous Cell Carcinoma of the Head and Neck (SCCHN), Recruiting
- Cetuximab IRDye800 Study as an Optical Imaging Agent to Detect Cancer During Surgical Procedures, Not Recruiting
- Imaging and Biomarkers of Hypoxia in Solid Tumors, Not Recruiting
- Multispectral Imaging to Characterize Patterns of Vascular Supply Within Lymphoepithelial Mucosa in Oropharyngeal Cancer, Not Recruiting
- Talactoferrin in Treating Patients With Relapsed or Refractory Non-Small Cell Lung Cancer or Squamous Cell Head and Neck Cancer, Not Recruiting
